enjoy your work

elneos[®] connect

Award-winning complete solutions for
electronics laboratories, training cen-
ters, production and assembly plants.

elneos[®] connect

The new laboratory furniture and assembly workstation system.

enjoy your work!

This is our motto – because workplace systems, measuring and testing devices and test systems for electrical safety and function are our passion and our product world.

As the market founder of electronic laboratory equipment for industry and education and a manufacturer with unparalleled vertical integration, we stand for the highest standards and individual solutions. With our *elneos connect* workstation and furniture system, we offer innovative practicality and safety – **the lifetime experience!**

Our new customer center

We have been successfully developing and producing our products in Freudenstadt for 70 years. Thanks to our high level of vertical integration in furniture construction and electronics, we have unique expertise in Industry 4.0 standards.

You can experience all of this directly on site in our new customer center.

We also offer interested parties the opportunity to visit the showroom virtually via a digital twin.

We look forward to your visit!

Visit our customer center in Freudenstadt with 1.100 m² of exhibition space in conjunction with a production tour.

On site: Please make an appointment by calling +49 7441 9144-404 or by e-mail: kc@erfi.de

Or online: Click on our homepage: www.erfi.de or directly into the virtual customer center.

We produce all technical workstation systems, electronic devices, measuring and testing devices, test systems for electrical safety and function as well as teaching systems for you at our Freudenstadt site on over 11,000 m⁽²⁾.

Our high level of vertical integration in furniture and electronics production is a guarantee of consistently high production quality. All production steps are subordinated to the principle of Industry 4.0. Our manufacturing expertise ranges from cutting, edging with laser technology, CNC free-form milling and drilling as well as the entire metal construction in furniture to PCB assembly, device construction and the electrification of complete laboratory, workstation and test systems.

This manufacturing expertise sets us apart as an innovative company. We are therefore always one step ahead when it comes to product innovation and our solutions have been recognized with prestigious design awards since the 1980s.

elneos® connect

the lifetime experience

The technology-leading workstation and furniture system *elneos connect* is characterized by comprehensive innovations and safety.

elneos connect offers maximum flexibility thanks to its basic profile, the L-shaped aluminum profile, which can accommodate additional profiles for different applications. The sophisticated profile system makes it possible to accommodate a wide range of cables, quickly adjust the working height and connect to a table-top bridge for holding equipment.

All this is possible thanks to the so-called connector. It connects the frame construction to the table and frees the profiles from the pure load-bearing function. The connector enables homogeneous and uninterrupted media routing.

The biodynamic workplace lighting from *elneos connect*, which can be adjusted in terms of brightness, light color and inclination, is a highlight thanks to further improved RGB LED technology and sensory color coding. It automatically adapts to the human biorythm. In addition, *elneos connect* can be equipped with a completely newly developed indication light, which can dynamically display the table status and / or measured value in different colors.

elneos® connect basic table

Laboratory workstations for industry and education in simple to highly complex designs for all requirements.

ESD base table elneos® connect

Equipment highlights

- Expanding profile 1 (vertical)
- Worktop ergo-line (corner radius 20 mm, laser edge)
- Integrated cable flap and cable tray
- Mobile pedestals with touch-to-open equipment
- Connectors in standard color green RAL DESIGN 1107070

elneos® connect in the electrical engineering laboratory

ESD electronics laboratory workstation elneos® connect

Equipment highlights

- Integrated cable flap and cable tray
- Integrated and biodynamic RGB LED light with BT and HCL function
- RGB indication light in storage board

Further features

- Expanding profile 1 (vertical)
- 19-inch/ 3 U device cockpit with *elneos five* device system for dual power supply unit, digital multimeter and function generator
- Mobile pedestals with touch-to-open equipment

ESD electronics laboratory workstation elneos® connect with elneos® Orgatower

Highlights of the equipment

- Worktop ergo-line (corner radius 20 mm, laser edge)
- Expanding profile 1 (vertical)
- RGB indication light on the shelf board for status display
- Integrated cable flap and cable tray

Further features

- 19-inch / 3 U device cockpit and storage board with *elneos five* device system for power supply unit, digital multimeter and function generator
- Integrated, biodynamic RGB LED light with BT (Bluetooth) and HCL function (Human Centric Lighting)
- *elneos Orgatower* with drawers and pull-out shelf for measurement technology

Electronics laboratory workstation elneos® connect

Equipment highlights

- erfi-Bridge (*green) with device system *acto*
- Electromotive height adjustment
- Front table edge with new alu-line tech edge and comprehensive laser edge
- Integrated cable flap and cable tray
- 19-inch / 3 U device cockpit made of aluminum
- Invisibly integrated RGB LED light
- RGB indication light across the entire table width

Cockpit equipment elneos® six

- 3U / 56 HP slide-in module for 1-phase AC source
- Universal plug-in units for additional DC sources, digital multimeters, power meters, function generators and arbitrary generators
- Control center to accommodate all devices except AC sources with 8-inch multi-touch display, 3D gesture control and voice control
- Plug-in unit 3 U / 95 HP for 3-phase AC source with intelligent Ring socket lighting incl. function labeling
- Connect insert plate with all device interfaces such as USB A and USB B, LAN, 10 digital outputs and 8 digital inputs

ESD electronics laboratory workstation elneos® connect

Equipment highlights

- erfi-Bridge (*green) equipped with *acto* device system
- Electromotive height adjustment
- Front table edge with new alu-line tech edge and comprehensive laser edge
- Integrated supply terminal in the table top
- 19-inch / 6 U device cockpit 10° inclined
- Allrounder multifunctional pull-out (cable drawer)
- Invisible RGB LED light
- RGB indication light across the entire table width

Special feature cockpit equipment elneos® six

- *elneos six* control center
- Plug-in units in 3 / 6 U for 1-phase and 3-phase AC sources
- Two universal plug-in units 3 U / 63 HP for additional DC sources, digital multimeters, power meters, function generators and arbitrary generators
- 3 U / 14 HP slide-in module for additional digital multimeters, power meters, function generators and arbitrary generators that are not integrated in the control center for space reasons
- Insert plate with rotary encoders and second airwheel
- Connect insert panel with all device interfaces such as USB A and USB B, LAN, 8 digital inputs and 10 digital outputs

elneos® connect in the assembly and testing environment

ESD assembly workstation elneos® connect

Equipment highlights

- Electromotive height adjustment
- Top and bottom shelf
- Top aluminum functional profile with stopper edge
- Horizontal aluminum profile with material shells
- Connectors in the third level

Further features

- Expanding profile 1 (vertical)
- Front table edge with Tech-edge alu-line
- Integrated cable flap and cable tray
- RGB LED light with BT and HCL function
- RGB indication light on the shelf
- Mobile pedestals with touch-to-open equipment

1. Software-controlled ESD assembly workstation elneos® connect

Equipment highlights

- *elneos fix* transfer system with ball roller conveyor
- Electromotive height adjustment for feed table, assembly table and simultaneously fully height-adjustable test components
- Ergonomically curved worktop with laser edge
- equipped with the *AWM* software ¹

Further features

- Mounting bracket with rail and trolley
- Partially tilting shelves
- Aluminum profile with screen holder and PC
- RGB LED light with BT and HCL function
- RGB indication light on the shelf
- Mobile pedestals with bow handles and Smart-Close

2. ESD test workstation elneos® connect with VDE test system CANclass®

Equipment highlights

- Test cabin with CANclass Compact Tester for electrical safety and function² including Candy test software
- RGB indication light on top of test cabin for good/bad indication
- QR code scanner included

3. ESD assembly workstation elneos® connect with elneos® Orgatower

Highlights of the equipment

- Extendable material trays
- Perforated metal panel above and below the table top
- *elneos Orgatower* extendable with drawers and pull-out shelf for integrating measurement technology

Further features

- Worktop ergo-line (corner radius 20 mm, laser edge)
- Storage shelf with lockable cable drawer
- Aluminum profile with screen holder and all-in-one PC
- Integrated RGB LED light with BT and HCL function
- equipped with the *AWM*¹ software
- RGB indication light on the bottom edge of the cable drawer

ESD test workstation elneos® connect with VDE test system®

Highlights of the equipment Test table left

- Electromotive height adjustment
- Front table edge with Tech-edge alu-line
- Test cover for large test specimens
- 19-inch base cabinet with CANclass device system for testing electrical safety and function¹ incl. Candy testing software

Highlights of the equipment Cockpit table right

- erfi-Bridge equipped with *acto* device system
- Electromotive height adjustment
- Horizontal aluminum profile with material shells
- Flat screen holder with All-in-One PC

Further features

- Front table edge with Tech-edge alu-line
- 19-inch/ 3 U device cockpit with *elneos five* device system for power supply unit, digital multimeter and function generator
- Integrated RGB LED light with BT and HCL function
- RGB indication light on the lower edge of the cockpit

elneos® connect in training

Training workstation elneos® connect

Equipment highlights

- Safety gas connection fitting with shut-off device for natural gas and LPG (*basic*)
- *elneos six* control center for simultaneous inclusion of all device groups except AC sources with 8-inch multi-touch display, 3D gesture and voice control
- Safety and switching unit (*basic*)
- Table top with Aluline edge at the front
- 10° inclined 19-inch / 3 U table structure
- Integrated RGB indication light across the entire width of the laboratory bench
- Vertical expansion profile 2 below the table top and above the table superstructure fitted with *acto* device system (*green)

Further features

- Compressed air unit (*basic*)
- Suspended container can be moved steplessly to the left and right
- Two DIN A4 experiment frames to hold the DIN A4 teaching aids
- two All-in-One PCs with 23-inch touch screen and monitor holder and
- Room control software *highlink Power*
- Socket outlet panels (*basic*)

Training workstation elneos® connect

Equipment highlights

- Control center *elneos six* compact vertically integrated with DC power supply unit, digital multimeter and function generator
- Table top with Aluline edge at the front
- Expand 2 extension profile (vertical) fitted with *acto* device system (anodized insert panels) on the left and right above and below the tabletop
- TechCube for integrating the DC and AC output stages
- Tilttable shelf incl. cable tray underneath
- Invisibly integrated RGB LED light

Further features

- Suspended container with one drawer incl. electronic central locking, infinitely adjustable to the left and right
- Mobile pedestal (under suspended pedestal) incl. electronic central locking system
- a DIN A4 experiment frame to hold the DIN A4 teaching aids
- LED warning light column
- Extension plate can be mounted on both sides to extend the table
- an all-in-one PC with 23-inch touchscreen and monitor holder
- Socket outlet panels and EMERGENCY STOP (*acto*)

ESD training workstation elneos® connect

Highlights of the equipment

- erfi-Bridge (*green) with device system *acto*
- Electromotive height adjustment
- Room control software *highlink Power*
- Two flat screen holders with All-in-One PC
- 19-inch/ 3 U aluminum device cockpit with *elneos five* device system for dual power supply unit, digital multimeter, function generator and 19-inch *basic* device system with oscilloscope and AC source, among other things

Further features

- Front table edge with Tech-edge alu-line
- Integrated, split cable flap and cable tray
- RGB LED light with BT and HCL function
- RGB indication light on the lower edge of the cockpit
- 1-row DIN A4 experiment frame incl. erfi Didactic teaching aids (basic package)
- Wall container with bow handles and Smart-Close

ESD training position elneos® connect with swivel superstructure and elneos® Orgatower

Equipment highlights

- Electromotive swivel table
- Completely covered with safety monitoring
- *elneos Orgatower* extendable with 2 compartments DIN A4 teaching aids and didactic panels
- 2-row DIN A4 experiment frame, adjustable in depth incl. erfi didactic teaching aids (automation, control engineering, building automation)

Further features

- 2 full-length expansion profiles fitted with *acto* appliance system
- Front table edge with Tech-edge alu-line
- 19-inch / 3 U swivel channel with *elneos five* device system for power supply unit, digital multimeter, function generator and *basic* device system
- Mobile pedestals with touch-to-open equipment

elneos® connect in the Monitoring

elneos® connect control center

Equipment highlights

- Electromotive height adjustment
- Electromotive folding superstructure
- Horizontal and vertical cable ducts and cable drag chain for clean cable routing
- Base cabinet with ventilation grilles at the front and storage space for PCs at the rear
- Highly stable chassis frame

Further features

- Horizontal mounting rails for 4 monitors
- Horizontal expansion profile 2 on the table top
- Lateral veneering

Fig. 1: Control station from behind with doors open to accommodate switch, PC, etc.

Fig. 2: Control station completely folded up.

Fig. 3: Control station fully extended.

1. The cockpit

The device cockpit is characterized by its top and aluminum profiles attached at the bottom light and extremely flexible for the attachment of system components.

2. The lighting

Indication light and workplace lighting with high-performance RGB LEDs - optionally with BT (Blue tooth) and HCL function (Human Centric Lighting). The task lighting offers optimum illumination and, with the BT/HCL function, light adaptation to the human biorhythm.
The indication light shows the table statuses.

Flexible
and safety

3. The connector

The central design and connector element of the furniture system is a decisive advantage for media guidance on the inside of the table. The Connector connects the table leg and frame construction, thereby guiding media of all kinds.

4. The Techkante alu-line

A newly developed, compact aluminum core with a highly robust plastic coating completely new functions. Two grooves accessible from below enable the perfect attachment of vices and a catching groove prevents small parts from falling.

5. The erfi-Bridge

The intelligent combination of the Expandprofil 2 creates a continuous media channel - the erfi-Bridge. It enables the continuous installation of devices vertically and horizontally.

6. The profiles

The innovative profile system from *elneos connect* is flexible, modular, economical, resource-saving and striking in form and effect.

7. The frame construction

Thanks to a 40/40 aluminum profile, this frame construction is very light with maximum stability and flexibility. Intelligent groove technology ensures free configurations at any time and infinitely variable table leg adjustment.

8. The container

The *elneos connect* container range offers touch-to-open technology. A special chassis with large castors ensures maximum stability, and roller containers can be converted into hanging containers at any time - and vice versa, of course.

The Connector

Highly stable and intelligent - The central and stabilizing component between the table leg and frame is the connector. It comprises the L-profile and other innovative profiles, allowing all types of media to be guided between the table frame and table leg.

The connector allows the table top to float and at the same time gives the system a very high level of stability. The table legs can be infinitely adjusted in depth as well as in height as standard. The Connector enables the system to support a surface load of several 100 kilograms.

The connector

Stable centerpiece for continuous media routing

The connector is the central, static component of the *elneos connect* laboratory furniture series. It transfers the high forces via the aluminum table legs and is the connecting element between the table leg and the table frame of the

floor to all system components. All types of media can be routed continuously through various additional profiles on the inside. The media in the clip profiles (expansion profiles), with a rotating function for opening, are also guided through the connector without interruption.

Stepless depth adjustment of the table legs

In combination with the aluminum base, the Connector allows all table legs to be moved continuously to any depth position. This means that more people can be comfortably seated at a work table.

Convertible table leg combinations

The table legs can be adjusted to the exact size required thanks to the infinitely variable adjustment. It is possible to design 4-leg, C-leg and T-leg tables in a versatile way. From a C-leg table can easily become a T-leg or a 4-leg table and vice versa.

Floating table top

The curved shape of the Connector makes the table top appear to float above the table legs. The free edge of the table offers a significant advantage, as it provides space for collecting trays, tool trays and the media guide. In addition, the aluminum frame underneath is set back and components are not in the way.

Individual height adjustment of the work surface

The Connector increases ergonomics, as it enables an individualized working height thanks to the infinitely variable vertical adjustment of the L-profile.

The colors of the Connector

Color surfaces of the connectors with new color indicators

elneos connect also sets new standards in terms of color. The color indication is taken over by the connectors. The innovative connectors are powder-coated as standard in a fresh and modern shade of green in accordance with the RAL DESIGN system (no. 1107070).

Holistic color indication: green - white - black - chrome Not only the *elneos connect* furniture system is given a modern look by the color indication. The *elneos five* appliance system and the new *elneos six* impresses with a consistent, user-friendly, which kept in the fresh color indication in many areas.

The color scheme and the fine color coordination between the laboratory furniture and appliance system played an important role in the development. Due to the simultaneous development of both systems, the color scheme was coordinated with each other. The color-indexed surfaces of the Connector lend each piece of furniture its individual character without obtrusive. The anodized extruded aluminium profiles of *elneos connect* complement the restrained character of the overall system.

The available colors pure white (RAL no. 9010) and graphite black (RAL no. 9011) can also be found in the device area, so that for each color a perfect unit. A high-gloss chrome-plated version is available for the communicative office/business sector.

Desired colors

On request, the connectors can be supplied in corporate colors so that an individual appearance can be maintained.

Standard color *elneos-green*
(RAL DESIGN 1107070), order no. ELCC1

Alternative color pure white
(RAL 9010), order no. ELCC2

Alternative color graphite black
(RAL 9011), order no. ELCC3

Alternative color high-gloss chrome-plated,
Order no. ELCC4

The profiles

Lightweight and functional - The *elneos connect* furniture series offers completely new combination options with its sophisticated profile system. The basis of the profile system is the L-profile. This basic profile is supplemented with other profile shapes, the expansion profiles and the telescopic profile for table height adjustment, giving *elneos connect* absolute flexibility and freedom.

L-profile

L-profile with fold-out expansion profile 1

L-profile with telescopic profile

L-profile with fold-out expansion profile 1 and telescopic profile

L-profile with expand profile 2 front panel and device series acto.

acto device system

L-profile with expand profile 1, telescopic profile and connector on the aluminum table frame

The L-profile

An L-shaped aluminum profile base serves as the basis for the entire profile system. Due to its shape, this profile has two legs which in turn can accommodate different profiles. All the so-called expansion profiles and the telescopic profile are precisely matched for mounting on the inside and outside of the L-profile and give the profile system numerous expansion options.

Long leg

The long leg has two cable chambers through both of which data and mains cables as well as compressed air lines can be routed. A round chamber is also used to accommodate hydraulic cylinders for height-adjustable tables. The long leg can also accommodate a foot height adjuster to compensate for uneven floors, as well as an additional hollow chamber to accommodate pins to extend the profile.

The leg has five T-slots, one of which is located on the face of the L-profile. Two grooves are located on the outside and inside of the profile and allow other profile system components to be connected. A clip groove on the inside is used to engage a pivoting aluminum channel. This aluminum channel is shaped so that it is flush with the overall shape of the L.

Short leg

The short leg has a T-slot on all three open sides and a pin can be inserted through the internal hollow chamber to extend the profile.

The expansion profile 1

One of the many possible additions to the L-profile with *elneos connect*

This profile is clipped onto the inside and can be swung open at any time using an intelligent rotating hinge. It is an aluminum profile for further accommodation of cables and small electrical devices such as data sockets or compressed air couplings. The profile also has two T-slots on the inside, which in turn any system components to be accommodated.

Socket strips can be easily mounted on the inside.

Useful addition to the L-profile

If the expansion profile and the L-profile are closed, the inner complexity of the entire base is not visible. The expanding profile 1 can be easily opened and closed again and again using an additional rotating profile that acts as a hinge. When closed, it forms a closed space together with the L-profile and its structure provides two additional chambers. The front chamber has a brush strip on the front so that measuring cables, data cables or mains cables can be elegantly fed to the user at the front without pinch points. An integrated divider inside the profile ensures that the chambers guarantee safe separation of different media.

Ingenious flexibility

1. Uninterrupted media routing on the inside of the table.
2. The connector allows this expansion profile to be opened.
3. The expansion profile can be fitted continuously or separately.

The expansion profile 2

Vertical

As an alternative to the expansion profile 1, a larger profile on the inside of the This profile is used to integrate electronic devices with a greater installation depth, such as safety and switching units, sockets or generators. The profile can be attached to the L-profile on one or both sides. Its vertical use means that horizontal superstructures or cockpits can be partially dispensed with. The profile is large enough to accommodate deeper components such as 3-phase automatic circuit breakers or motor circuit breakers. The components are therefore always accessible and do not have to be installed in cable trays.

Vertical use

The profile has 6 T-slots, four of which face outwards and two inwards. The profile is open at the front and can accommodate devices from the *acto* series. The 45° mounting angle keeps the installed in an ergonomic position for the user. An integrated groove on the front forms the receptacle for a 19-inch threaded strip which the insert plates are screwed. The inner grooves are used to accommodate top-hat rails, sockets, plugs or electrical installation material.

Three rooms in one profile

Internal grooves allow several separating surfaces to be fitted, creating up to three separate spaces. These spaces carry media without crosstalk behavior and without affecting the overall installation depth.

Lateral connection of system components

The profile is designed in such a way that, seen from the front, it runs diagonally inwards on the outside. This shape opens up a free space on the outside of the profile at tabletop level, which enables the connection of swivel arms for monitors or swivel lights.

The expansion profile 2

Vertical and horizontal

The Expand profile 2 can be installed both vertically and horizontally or in combination as erfi-Bridge. In each variant, modular equipping with the *acto* device series is possible as well as cable and media routing the profile.

In the horizontal position, the expandable profile 2 serves either as a small table superstructure or, mounted between the L-profiles, as a small cockpit. By combining the Expand Profile 2 vertically and horizontally, a bridge can spanned across the table from left to right.

This bridge carries superstructures such as cockpits or storage boards.

Intelligent slope in the horizontally installed state

Installed horizontally, the profile enables ergonomic integration of appliances at the front thanks to its 45° angle. Horizontally and vertically, the miter cut creates a new, coherent unit - the erfi-Bridge.

The experienced Bridge

1. enables continuous cable routing,
2. can be installed and retrofitted at any functional level,
3. can accommodate components in any position,
4. also accommodates deep components,
5. shields electromagnetic radiation on the inside,
6. can be set up as a standalone system,
7. can continue the vertical profile down to the floor,
8. offers various front panel colors (natural anodized as standard),
9. and also holds boards and cockpits.

The erfi-Bridge

The expand profile 2 as erfi-Bridge - The erfi-Bridge enables continuous cable routing and can accommodate components of different installation depths at any position. The combination of the expandable profile 2 can be continued down to the floor and also holds boards and cockpits.

The height adjustment

Height adjustment through the telescopic profile

The innovative telescopic profile with functional grooves additionally stabilizes the table if electromotive or mechanical height adjustment is required. A hydraulic cylinder is inserted into each L-profile and a total of four hydraulic cylinders lift the entire table construction.

The telescopic profile encloses the L-profile and forms a highly stable guide with it. When the hydraulic cylinders extend, the telescopic profiles remain on the ground, with the cylinders and cables invisible.

Stable height adjustment with additional function

The telescopic profile has a T-slot on each end face. This allows PC trays or other system components to be adapted.

Optional control unit

The electromotive height adjustment can be controlled from a tablet or smartphone via Bluetooth in conjunction with the erfi software. Various user settings can be stored in an app. Alternatively, the height adjustment can be controlled via the new *elneos six* device system.

Long stroke lengths with high lever loads

By using the telescopic profile, long stroke lengths can be moved with high lever loads, as the load is transferred from the lifting cylinder to the stable telescopic leg. Our experience with electromotive height-adjustable tables makes it possible to maneuver table loads of up to 600 kg.

The new telescopic profile with its form-fit ensures particular stability and at the same time enables the installation of new and innovative compact cylinders with a stroke length of 280 mm to 500 mm at a height of 1300 mm.

Lightweight, highly stable and ... Convertible

All-aluminum furniture

elneos connect is the all-aluminum furniture system in the electric laboratory table sector. Aluminum has been consistently used for almost all components, including the framemaking *elneos connect* lightweight. In addition to many additional functions, the use of aluminum results in a weight saving of over 30% compared to previous systems. This makes the system much easier to handle in new room situations.

Perfect docking station

The aluminum functional frame is made of a highly stable 40 x 40 mm aluminum profile, which has a T-slot on each side. This guarantees infinitely variable depth adjustment of the table legs. The side grooves allow other system elements, such as e.g. suspended pedestals, PC trays or cable trays can be at any point.

The weight saving associated with the aluminum frame is particularly important during the assembly or relocation phases. a decisive advantage. The specially developed profile structure is also designed for heavy loads and offers very high stability.

Stepless adjustment

All frames can be used for stepless adaptation of all types of cable ducts and drawer containers. The curved shape of the connector creates a free space between the underside of the tabletop and the connector, which is useful for attaching cable ducts and drawer containers. of brackets can be used.

The depth variability gained enables extreme legroom and high flexibility of the frame for other foot positions.

Intelligent connection technology

Thanks to newly developed connectors, longitudinal or transverse frames can be elegantly inserted. Longitudinal frames, for example, can also be easily moved in position to create additional space for cable ducts or other system components.

The new design is characterized in particular by its adaptability and changeability. With this flexibility, the *elneos connect* table frame is superior to any steel frame*.

The ergo- line worktop

When developing the ergo-line worktop, particular emphasis was placed on ergonomics. The front corners of the work surface have been rounded and correspond to the radius of the connector underneath. The ergonomic curves prevent bumping and significantly reduce the risk of injury. At the same time, the table top is protected against impact by the radius at this point.

The edgeband on this worktop is applied by machine in one piece and is not interrupted. It is a thick edgeband with high impact resistance. This radius is achieved using specially equipped CNC milling centers with adapted edging units.

Laser edging technology for all decors

A new laser technology for edge fusing enables premium quality for all wooden elements. A durable and seamless joint is created for all decors. The fusion of edge and panel increases the thermal stability and moisture resistance of the components.

The color of the material layer is precisely matched to the decorative layer, creating a look that gives the impression of solid material. The laser edging technology makes the material layer particularly hard prevents the joint from rubbing out in everyday use - dirty joints are a thing of the past.

Rows of tables and individual tables

This radius is ideal not only for individual tables but also for rows of tables. The table top is unassailable and ensures a long service life for your laboratory equipment. The new front white decor gives the system a refined character and the appropriate elegance.

The Techkante alu- line

The new exposed load-bearing Tech-edge alu-line is equipped with two T-slots and a channel function. Vices and other components can thus be attached without twisting. The integrated ribbing on the front protects clothing from soiling and a highly stable plastic coating protects the base body.

Ergonomic best performance

The newly developed cover caps have a rounding with a radius of 20 mm. This rounds off all table corners and is pleasant to the touch. The tight radius of 20 mm is also ideal for rows of tables and guarantees a longer service life for your furniture.

T-slots and channel function

The T-slots integrated on the underside used to connect system components such as storage trays or material chutes. The edge is also designed so that a vice can be attached without twisting and without damaging the table top. The edge profile has a slight indentation on the top so small items such as screws, tools or writing utensils cannot fall off.

ESD version

The plastic coating of the tech edge is also available in an ESD version for the conductive laboratory benches. An additionally developed tool guarantees perfect flow behavior during the manufacturing process.

Table top and cockpit

Device holder with invisible lighting concept

The *elneos connect* laboratory furniture system offers table-top mounting systems for 19-inch devices and free-standing device cockpits above the table surface.

The modules are characterized by extensive new functions such as aluminum profiles, impact protection, a swiveling and adaptive lighting concept that is invisible from the outside, Bluetooth in conjunction with HCL function and an integrated indication light.

19-inch device systems *elneos*® six, *highlab*® and *basic*

The compact design of *elneos six* enables a significantly reduced installation depth and is compatible with other standard-compliant 19-inch device systems. The 19-inch device series *highlab* and *basic* seamlessly alongside the capacitively controlled device series *elneos six*, whose user interface has been color-coordinated.

Profiles make assembly easier

The table structure and the cockpit have aluminum functional profiles on the upper and lower sides of the device mount, which form the mounting mechanism for the 19-inch slide-in units. The new *elneos six* equipment system is the perfect complement to the *elneos connect* furniture series. No changes need to be made when retrofitting with additional slide-in units.

Wood or solid aluminum

Both components, table superstructures and cockpits, are available in wood laminate and alternatively in solid aluminum.

The cockpit profiles

Thanks to their versatile design, the profiles below the cockpit can components, data cables and table lighting.

Upper profile

The upper profile is used for extensive network, data and measuring cables. This allows cables and media to be routed between two adjacent tables on this level inside the profile. The of adjacent cockpits can thus be easily realized via this cable compartment without cables on the rear of the cockpit restricting the user. The upper profile also has an elevation on the top side, which provides slip protection for cockpits and boards and also serves as impact protection.

Integrated T-slots

An integrated T-slot it possible to dock system components onto the cockpit cover plates. This means that brackets and dividers can adapted horizontally at any point via a slot nut, for example for use as bookends. The aluminum profile on the underside also has T-slots for further connection options for system components such as storage trays, device platforms or swivel arms.

Indication light and lower profile

The special profiles for the indication light are below the cockpit. The front, table-wide indication light uses an RGB light strip to provide information about the status of your laboratory table at all times.

The swivel-mounted RGB LED work light is invisibly integrated into the lower profile and provides intelligent workplace illumination for glare-free, reflection-free and shadow-free working. The luminaire can mounted on any shelf with the Toplight aluminum profile and retrofitted with the swivel insert.

The lighting concept

The latest LED technology was used in the in-house development of the *elneos connect* lighting. The indication light and an invisible and swivel-mounted RGB LED workstation illumination are integrated into a round groove at the front of the cockpit's lower Toplight profile.

Indication light

The indication light is an intelligent light strip that can visualize the table status and optionally the measured values from the *elneos® six* device system in real time.

Intelligent electronics with state-of-the-art microprocessor control can visualize the actual value and limit values simultaneously as a light segment.

An innovation from erfi that raises the benchmark in terms of safety to a new level.

Workplace lighting

The swivel-mounted RGB LED work light invisible to the table in the lower profile. This light is controlled by powerful RGB LEDs as well as white high-performance LEDs. The light can be swivelled in its holder, it is dimmable and any light color can be set. The luminaire can be mounted on any shelf with the Toplight aluminum profile and retrofitted with the swivel insert - so the workplace is always optimally illuminated. Another plus is the adjustment of the light color to the current daylight situation, as well as the avoidance of shadows. The new luminaire can also be used as a single luminaire and is alternatively available with white LEDs only.

Premium light quality

- Luminaire with high-performance RGB LEDs and white premium LEDs
- With non-contact sensors for dimming and light color adjustment as standard
- Dimming and light color adjustment can be controlled manually and remotely (optional)
- Installation height integrated in Toplight profile
- Light color 4000 K neutral white as standard, light colors in warm white, cool white and daylight are available on request (optional)
- Tilttable for optimum light control
- Invisible and glare-free
- Color fastness and good contrast
- Area light thanks to premium LEDs
- Service life up to 50,000 h with 30 % savings
- Remote control via Bluetooth with *elneos six* device system, tablet and smartphone (optional)
- Beam angle 120°
- Color rendering RA> 85 %
- Control of the lighting climate in the shortest possible time thanks to memory function
- RGB LEDs and white LEDs can be controlled independently of each other

The container program

Handleless design - touch-to-open technology

The optional touch-to-open technology* opens the drawer automatically when light pressure is applied to the drawer front. An integrated tumbler prevents unintentional opening. Even if both hands are occupied, the drawers can be opened and closed elegantly with a light touch of the knee.

Design rollers with a large diameter

Due to their size (ø 75 mm), the castors have superior running properties with particularly high stability. The load capacity per castor is 100 kg when moving and up to 200 kg when stationary. The running noise is virtually silent and the wear is fantastically low.

Stable integrated chassis

A stable integrated chassis holds the maximum load on the castors. As a result, the castors cannot tear out and can withstand the loads in industry and education.

Maintenance-free drawer runners

The guideways have a very long service life thanks to the built-in automatic self-cleaning of the raceways.

Base table type 1.1

Connector color:

elneos-green ELCC1

pure white ELCC2

graphite black ELCC3

chrome-plated ELCC4

Table type 1.1 Basic table

Worktops: ergo-/alu-line: 30 mm HPL laminate chipboard; solid core: 12 mm melamine resin core board; multiplex: 30 mm oiled

Worktop decor: The decor can be selected in front white or multiplex. For a jointless connection, all decors (except solid core and multiplex) are manufactured with a laser edge.

Table frame: Sturdy aluminum table frame with all-round groove technology for connecting components and high weight savings. Alternatively as all-round fully welded steel frame.

Connector: elneos green (RAL 1107070), pure white (RAL 9010), black (RAL 9011) or chrome-plated.

Aluminum profiles: Four aluminum profile legs, with two cable chambers for separate media routing, integrated clip groove technology for holding ex- pand profiles, 8 grooves for standard sliding blocks and a chamber for holding the electromotive height adjustment. Can be mounted at any point on the aluminum table frame and extended upwards as required.

ergo-line (laser edge)

Multiplex

Solid core

Table type 1.2 with 180° cable flap

Design as table type 1.1 but with additional cable flap and integrated cable tray with functional surface at the rear of the work surface.

Cable flap: 180° , split flap possible.

Cable tray: Can be flexibly mounted on the aluminum functional frame (150 mm usable depth), ergonomic functional surface for socket strip.

Work surfaces with conductive ESD design

All worktops are also available in an ESD version and in an elegant white front decor. With the alu-line worktop, the plastic coating of the aluminum profile is made of a high-quality conductive plastic. Conductive plastic has a different flow behavior in the production process. A special tool has also been developed to ensure that the conductive version also has a good shape with the table top.

Order no. for split cable flap: ELC1.2.GK

Lowerable cable flap

Table type 1.3 with lowerable cable flap Design as table type 1.1 but with a cable flap that can be lowered inwards and an integrated cable tray.

Cable tray: Flexible mounting; with a usable depth of 300 mm.

Cable flap: Caninwards with two brush strips and two opening positions, centered and fully open position.

Special features

- Easy opening and quick access thanks to One-Finger-Touch and Quick-Access
- Perfect sorting of the outgoing Media on the table surface through two brushes
- No protrusion of the cable flap during opening and closing
- Front brushes improve accessibility
- Rear brushes optimize the work surface
- Lateral cable outlet through lateral brushes

Table types in basic design

Table types 1.1 to 1.4, however, with 90° corners, all-round steel frame, completely welded (version B1) or optionally bolted (version B2), without connector, are also available as Basic versions.

Order note

Add the order number of the table series 1.1 to 1.4 with ".B1" or ".B2". For example: Table type 1.1, 1600 mm long, 850 mm deep, ergo-line: "ELC1.1.1681.B1". Adding ".B1" automatically converts an *elneos connect* table into a basic version with 90° corners and all-round welded steel frame without connector.

Multiplex 90° corners

Figure 1:
4-leg table with
with electromotive height
adjustment, type 1.1

Technical product description:

4-leg table with lifting columns type 1.1 Worktops: 90° corners / alu-line: 30 mm HPL laminate chipboard (laser edge), front white; Multiplex: 30 mm oiled.

Table frame: Fully welded steel frame.

Table frame: Powder-coated, RAL 9011.

Height adjustment with collision protection: 4 x lifting columns. Lifting length: 650 mm, lifting weight 4 x 120 kg (minus the individual table weight!). Extremely quiet and fast drive. Noise level of only

approx. 22 dB. Max. Travel speed 38 mm / s. Optionally available with high-speed lifting columns, high-speed travel speed max. 80 mm / s. Single, 2-, 3- or 4-parallel or multi-parallel movement with up to 16 columns. With PIEZO collision protection. As soon as the table an object, the movement is stopped. Electrically movable via display. 4 memory locations for height adjustment.

Note: The tables can be extended to accommodate boards and device cockpits using adapters and Expand 2 profiles.

adjustment, type 1.1

Technical product description:

C-foot tables with lifting columns type 1.1

Worktops: ergo- / alu-line: 30 mm HPL laminated chipboard (laser edge), front white; Multiplex: 30 mm oiled.

Table frame: Sturdy aluminum table frame with all-round groove technology for connecting components and high weight savings. Alternatively as all-round fully welded steel frame.

Height adjustment with collision protection: Powder-coated, RAL 9011. 2 x lifting columns. Lifting length: 650 mm, lifting weight 2 x 120 kg (minus the

individual table weight!). Extremely quiet and fast drive. Noise level of only approx. 22 dB. Max. Max. travel speed 38 mm / s. Optionally available with high-speed lifting columns. Can be moved individually, 2-, 3- or 4-parallel or multi-parallel with up to 16 columns. With PIEZO collision protection. As soon as the table hits an object, the movement is stopped. Electrically movable via display.

Note: The tables can be extended to accommodate boards and device cockpits using adapters and Expand 2 profiles. Compatible with system components in Basic 2 version. See page 82. Bracing is recommended.

Meeting table type 1.3

Figure 1:
Meeting table type 1.3

Technical product description:

Meeting table type 1.3 Height-adjustable gas lift table, slim design, foldable and mobile.

Work surfaces: 90° corners: 19 mm direct-coated, front white.

Alternative flipchart use possible with optional magnetic and writable work surface.

Table frame: Powder-coated RAL 9011, including table top folding function.

Mobile with sturdy swivel castors Ø 60 mm, 2 of which can be locked.

Height approx. 715 to 1215 mm plus table top.

Height adjustment: Gas spring height adjustment 450 N (200 N table top / 250 N load). Stroke 500 mm. Adjustable via intuitive operating button.

Dynamic frame load without table top: Dependent on gas spring strength.

More than 450 N available on request.

Additional gas spring optional (approx. 100 to 300 N),

Order no.: ELH5.100

L-profile

The one-piece L-profile

Device cockpits and storage shelves are mounted on rear profiles in one piece. Alternatively, the rear base profiles can also be extended (extension profiles, see next page). The one-piece profiles offer maximum stability thanks to their shape and uninterrupted structure.

Continuous foot profiles

Exterior and interior view of the L-profile

The L-profile for topping up

The L-profile offers the option of extending the rear profile legs as required with an extension profile. The extension is achieved by means of internal spikes that are inserted into the corresponding cylinders of the lower profile. L-profile and at the same time form an anti-rotation protection. The profiles are also secured. A highly solid connection that is invisible from the outside when installed.

Mobile Table frame

Castor set and Frame bracing

The mobile table frames
The tables with mobile frame can be moved quickly and easily. The mobile frame consists of a sturdy steel frame with cross bracing and 4 swivel castors Ø 100 mm. Two of the swivel castors are lockable. The specified height of a table includes the height of the castors.

Mobile table frames	
Table width	Order no.
1,200 mm	ELC8.3.1200
1,600 mm	ELC8.3.1600
1,800 mm	ELC8.3.1800
2,000 mm	ELC8.3.2000

Roller set
The castor set consists of four 100 mm diameter swivel castors, two of which have brakes. The height given for a table includes the height of the castors.

Roller set
ELC8.4.0100

Frame bracing
The frame reinforcement gives the table additional stability, particularly recommended for mobile tables and cockpit tables with a large number of integrated appliances. The frame reinforcement is available for the rear or for the rear and sides.

Frame bracing		
Table width	rear only	Rear and side

2,000 mm	ELC8.1.2000	ELC8.2.2000

As an alternative to the black anodized telescopic legs, these are available in silver anodized.

The technology of electromotive height adjustment
Hydraulic lifting cylinders are hidden out of sight in the L-profile without wasting valuable cable space. The aim of developing a table system that conceals the height adjustment as far as possible has been completely successful. During the lifting process, the entire workstation, including all system components including suspended containers and superstructures the desired height. The hydraulic height adjustment is completely insensitive to impact and force impulses and is superior to any mechanical gear height adjustment. The height of several table systems can be linked and adjusted synchronously with just one drive pump.

The electromotive height adjustment in conjunction with BT (Bluetooth) The height adjustment can optionally be controlled via Bluetooth using a smartphone or tablet. It is also possible to save different user heights.

Height adjustment

The electric height adjustment
Compact height adjustment system with maximum stability and load capacity. The telescopic leg, which includes the L-profile, guarantees very high stability. The telescopic leg offers additional grooves and therefore an optimum connection option in the lower table area. Concealed media guidance during the height adjustment process is made possible by the expansion profile 1 inside the L-profile. It moves together with the L-profile and media that are guided in the L-profile.

Technical data for electromotive and manual height adjustment using a hand crank
Stroke:
300 mm from 780 to 1080 mm
400 mm from 780 to 1180 mm (alternative)
500 mm from 780 to 1280 mm (alternative)

Lifting force: 350 kg, alternatively 600 kg
Lifting speed: approx. 15 mm/s Height adjustment at the touch of a button incl. digital display in cm. Memory function for storing 3 positions. Alternatively controllable by elneos six device system.

EMC: very low electromagnetic radiation, particularly suitable for use at computer workstations or in the electrical engineering sector.

Special features of the electric height adjustment

- 1. No waste of cable space**
The height adjustment is designed so that the cable compartment inside the L-profile is not affected. The function of the L-profile and the media feed are retained.
- 2. Maximum stability and maximum adjustment range**
The new telescopic profile with its form-fit connection to the L-profile ensures stability and at the same time enables the installation of new and innovative compact cylinders. A lifting capacity of up to 600 kg is a decisive feature.
- 3. Optimum usability thanks to integrated grooves**
The telescopic profile is an extruded aluminum profile with integrated functional grooves. All conceivable system components can be mounted on this telescopic profile without following the lifting movement. If the system components are to follow the lifting movement, they can be connected directly to the movable L-profile.

4. Media management and media protection
In the *elneos connect*, media is always concealed as standard and also by the telescopic profiles during the lifting process. Even large quantities of cable are concealed on all sides by the expansion profile 1 during the lifting process and protected against external influences.

5. Expandable and flexible without conversion work
Expand profile 1 can be retrofitted at any time. The telescopic profile encloses the L-profile in such a way that the inside allows the Expand profile 1 to be retrofitted.

6. Retrofittability
The new height adjustment system has been developed in this way, that it can be integrated into existing elneos connect tables can be installed.

Manual height adjustment systems
The manual height adjustment systems can be supplied with a crank or alternatively with a screw clamp connection in accordance with the adjacent ordering table.

Angle connections for room design

Angle connections

The *elneos connect* furniture system offers a very high degree of flexibility thanks to the variety of angled linking tops. The design corresponds in principle to the basic tables.

All angled joints are designed with the ergo-line tabletop edge and therefore also complement the work surfaces of the adjacent tables, which are equipped with the alu-line edge.

Storage shelves

Tiltable shelves, height-adjustable
19 mm thick chipboard, laminate-coated, edges all around with high-impact resistant 2 mm ABS plastic profile; infinitely height-adjustable and tiltable; front with recessed anti-slip edge, incl. aluminum profile with functional grooves.
Decor: elegant front white
Alternative version: ESD version (volume conductive).

Straight shelves, height-adjustable
19 mm thick chipboard, laminate-coated, edges all around with high-impact resistant 2 mm ABS plastic profile; infinitely height-adjustable incl. aluminum profile with functional grooves.
Decor: elegant front white
Alternative version: without aluminum profile mounted underneath, for direct support on horizontal expansion profile 2; each in ESD version.

Type 1 - entire table width
The board encloses the rear foot profiles and extends to the outer edge of the table.
Type 2 - between rear foot profiles
The board is positioned between the rear foot profiles. The board can be tilted by 15° to the left and right by simply loosening a screw. An optional tilting clamping lever can be provided for free adjustment.

Storage shelves for angle combinations

Corner shelf

The boards are infinitely height-adjustable and are supplied with an aluminum profile with functional grooves underneath. The board is made of 20 mm thick laminated chipboard. The edges are wrapped all around with highly impact-resistant 2 mm ABS plastic profile.

Decor: elegant front white

Alternative version: Without sub-mounted aluminum profile for direct support on horizontal expansion profile 2; each in volume conductive ESD version.

The illustration shows top left the link form 1 and top right the link form 2.

Functional profiles for storage shelves

Top aluminum functional profile
The Top front aluminum profile provides intelligent impact protection at shelf level and enables intelligent connections of many system components thanks to functional grooves on the top and bottom. The profile already has a front stopper edge as standard, which is particularly advantageous for tilting shelves and also forms a defined stop.

The functional profiles for storage shelves
The front edge of the shelf can also be fitted with two innovative aluminum profiles, Top and Toplight.

Top aluminum functional profile, front side	
Board length	Order no.
1,200 mm	ELC2.3.1200
1,600 mm	ELC2.3.1600
1,800 mm	ELC2.3.1800
2,000 mm	ELC2.3.2000

Toplight aluminum functional profile
Like the Top profile, the Toplight profile has a functional groove on the top and bottom, as well as a stopper edge. The profile can optionally accommodate the new swivel-mounted and dimmable RGB LED light as well as the indication light on the front (see following pages). On the underside, the profile has a holder for the newly developed LED light family.

Toplight aluminum functional profile, front side	
Board length	Order no.
1,200 mm	ELC2.4.1200
1,600 mm	ELC2.4.1600
1,800 mm	ELC2.4.1800
2,000 mm	ELC2.4.2000

- Basic version:** without light
- Option 1:** LED luminaire with white LEDs; can be swiveled and dimmed using a contactless sensor.
- Option 2:** with additional RGB LEDs; light color can also be tuned using a second touchless sensor.
- Option 3:** with indication light; the indication light is located on the front of the aluminum profile and has its own intelligence. It always shows the current status of the laboratory bench and therefore significantly improves safety at the workplace.

LED workstation lights

Sensor-controlled LED task light The innovative task lights from *elneos connect* have been developed in such a way that they do not take up any additional space at the workplace and at the same time guarantee maximum benefit and comfort. Intelligent sensors take over complete control of the lighting technology. The luminaires can be switched and dimmed without contact - the light color and light climate are also adjusted without contact using the latest sensor technology.

A slight approach of the hand to the corresponding sensor causes the luminaire to adjust its color spectrum according to an intelligent algorithm. Once the desired light climate has been reached, the hand can be removed from the sensor and the luminaire retains the set color. The last set light climate is saved (memory effect). The new luminaires are based on modern LED technology. The in-house development of the luminaire family made new concepts possible and the in-house production of the luminaires at the Freudenstadt plant guarantees consistently high quality and the best service.

The lights are invisibly installed in the Toplight aluminum functional profile (see previous page), have an integrated glare shield and can be swiveled. No additional space is required underneath the shelf or appliance cockpit.

- Special properties**
- Invisible LED task light, built into the Toplight aluminum functional profile
 - No loss of space under the board or cockpit
 - Pivoting luminaire for optimum light control
 - Integrated glare protection
 - With white LEDs or with additional RGB LEDs (mixed configuration in each case with high-performance LEDs)
 - Contactless sensor for switching & dimming
 - Contactless sensor for controlling the light climate. An algorithm enables the desired light color to be set.
 - Uniform, high-contrast and reflection-free illumination of the work surface without shadows thanks to premium LEDs, color-fast.
 - Interface for external control via I²C bus interface. This means that the luminaire can also be controlled remotely via the new *elneos six* device series.
 - Different length variants, matched to the respective table lengths.
 - Can be retrofitted to the Toplight aluminum functional profile at any time.
 - The luminaire body can also be used on its own without the Toplight aluminum functional profile, as the luminaire body consists of a compact aluminum profile.

Intelligent Indication light

Example: Measured value display, display of the current value of voltage and current

Intelligent indication light

The indication light has a self-sufficient power supply and its own control electronics. This means that this important safety function works independently and faultlessly at all times. The indication light makes a decisive contribution to improving function and safety in the workplace.

Measured value visualization

Indication light with maximum flexibility - when function meets design!

The new indication lighting system can be integrated at any point in the workplace and, with its curved, elegant shape, adapts seamlessly to modern working environments. Whether horizontally across the entire table width on table superstructures, table tops or vertically, following curved shapes - this system offers unlimited flexibility and sets stylish accents.

The system can now even be installed in table surfaces at any integrated into the site.

Innovative functions: Real-time measured value visualization for maximum precision

This advanced indication light system takes the display of measured values to a whole new level. It dynamically visualizes the live measured values of the *elneos six* device system in real time and without any delay - precise, reliable and clearly structured. Thanks to the direct connection to the modern data bus of the device system, current measured values are immediately displayed on the light strip. Whether as a dynamic running light, segmented bar display or continuous color gradient - the system offers a wide range of display options. Different colors and gradients ensure intuitive data acquisition.

... with status and live measured value display

Example: Measured value display, display / monitoring of limit values

Safety redefined: Limit value monitoring with visual feedback

The indication light system not only offers an impressive display of real-time data, but also makes a significant contribution to increasing workplace safety. It visualizes minimum and maximum values on the light strip and enables the user to keep an eye on the current situation at all times. If limit values are exceeded, the system warns with colored signals - flashing in specific colors immediately informs about potential dangers.

More safety and control in the workplace With the new real-time measured value monitoring, this indication light sets new standards for safety and efficiency in the workplace. Thanks to its intelligent visualization and flexible mounting options, it not only ensures a modern, tidy and safe working environment, but also provides a high level of safety.

appearance, but also for maximum safety and control.

Table status display

The indication light can inform the user and others about the current status of the laboratory workstation in parallel with the measured value visualization (uniform illumination). However, pulsing and flashing are also possible as well as the display of a pressed emergency stop.

Example states of the indication colors

- Normal state:** Laboratory table is switched on and operates normally.
- Danger:** e.g. limit values exceeded (voltage/current limit values of multimeters, generators, etc.).
- Device statuses:** Devices with Low voltage are enabled.
- Device statuses:** Devices with extra-low voltage and low voltage are enabled.

The indication light from erfi - the indispensable Security solution that takes your workplace to the next level!

Allrounder multifunctional pull-out

The Allrounder multifunctional pull-out is integrated into the appliance cockpit and thus forms a single unit. It is alternatively available as a solo version, incl. functional shelf on the top. The Toplight aluminum functional profile on the underside can be ordered as an option to accommodate the LED workstation lighting and the RGB indication light.

Features of the all-rounder

- Very simple media routing to the built-in appliances and into the rear aluminum base profiles

- Keeps the workplace tidy
- For professional tool storage, media storage, media management and much more.
- Easy to open and good accessibility
- With high-quality guide, with brush strip at the front
- Lockable on the underside, thus securing valuable tools and other valuables
- Allrounder multifunctional pull-out dimensions: H: 75 mm x usable depth 130 mm. The cockpit is raised by 85 mm in combination with the Allrounder. The solo version has an overall height of 113 mm.

19" cockpits in basic design

Figure 2, detailed view:
Table with 19-inch / 3 U cockpit in Basic version.

19-inch cockpits 3 U and 6 U in basic version
Suitable for all standardized 19-inch device systems.
The cockpit rests on top of the rear foot profiles and has no recess.

Cockpit is made of wood / laminate. The cockpits include an intelligent and standard-compliant 19-inch mounting mechanism for 19-inch partial and full racks. Standardized plug connectors according to DIN 41612 type H 15.

DIN A4 cockpits

DIN A4- Cockpits

The A4 cockpits made of wood / laminate offer plenty of storage space for files and everyday items. Thanks to the steel frame underneath, the DIN A4 cockpits are particularly resilient. All cockpits are equipped with the Toplight aluminum functional profile to accommodate the RGB LED lights and indication lighting.

Design variants:

- DIN A4 cockpit as an open shelf
- DIN A4 cockpit with sliding doors
- DIN A4 cockpit with roller shutter

The versions with sliding doors and roller shutters are lockable. The usable height is 330 mm. The open shelf version a usable height of 349 mm. All DIN A4 cockpits have a total height of 387 mm and a depth of 360 mm.

Expansion profile 1

The expand profile 1 - A clip profile
The profile can be clipped onto the inside of the L-profile. It has two cable chambers and a brush strip at the front, through which the cables of the front cable chamber can be routed to the user over the entire front height. An internal partition guarantees separation from other media in the cable chamber behind.

The entire profile can be twisted open and allows excellent access to all media - clip, twist, done! A specially developed opening mechanism ensures perfect ergonomics. For example, measuring cables can be routed in the front chamber. The rear chamber can accommodate power cables.

This ensures ideal separation of the media in terms of electromagnetic compatibility. The duct can be fitted to the L-profile at any time. Together with the L-profile, the expandable profile 1 creates convertibility with optimum cost-effectiveness. In addition, the long side of the Expand profile 1 has two stable grooves for fastening a wide variety of system components.

The profile is designed so that it is guided from the floor through the connector on the inside of the table. This is the ideal way to reach every functional level. Once again, the connector proves itself in form and function. In training facilities, the case can be locked to prevent unauthorized opening.

Split expansion profile 1
Expanding profile 1 is already sensibly divided at the factory so that, for example, the area above the tabletop can be opened independently of the area below the tabletop. Expanding profile 1 offers maximum functionality combined with optimum handling.

Ordering information: Please replace the "x" with L= left or R= right.		

A wide variety of media cables can be easily routed to the front with the clipped-in Expand profile 1.

Expandprofil 2

The Expand profile 2 can be installed vertically and horizontally. This results in three different installation situations:

1. It is only mounted vertically on the inside of the L-profile on the rear L-feet. It can also be used on one side.
2. It can only be installed horizontally underneath storage shelves or cockpits, on its own or as a table-top unit.
3. Installed vertically and horizontally, it forms the erfi-Bridge. The example of the **erfi bridge** shown here is fitted with the *acto* insert panel system on all three sides.

The profile size and design were chosen so that 3-phase elements can be integrated quickly. Thanks to its design, the profile can be used both vertically and horizontally and serves as a static support profile for storage boards and device cockpits. This creates a bridge that has a very high placement capacity thanks to its horizontal and vertical structure.

The erfi-Bridge enables free cabling from the vertical to the horizontal. The potentially high assembly capacity also ensures the necessary space reserve for future expansion stages.

Example of the erfi bridge shown on the left

1 x variable compressed air with pressure gauge and 3 quick-release couplings, 1 x ring circuit panel with 4 mm laboratory sockets and BNC sockets;

Example of the horizontal erfi bridge shown here

2 x 4 socket outlets with earthing contact on the left and right, 1 x extra-low voltage with 3 x 17.5 V,
1 x isolating transformer 230 V / 100 VA, 2 x foreign sockets (Switzerland and USA), 4-way RJ 45 switch, 4-port RS 232 interface and 1 x ring cable field;

Exemplary assembly of the erfi bridge shown on the right

1 x 3-phase safety and switching unit with motor protection switch, all-current sensitive NFI switch, key switch,
Emergency stop button, 3-phase control indicator and 1 x socket outlet with earthing contact;

Vertical expansion profile 2

Exemplary compilation
Shelf board table with continuous expander profile 2
Equipment: 3-phase safety and switching unit with large fuse elements, floating socket with isolating transformers, non-floating sockets and interface panels, three shelves with RGB LED lights incl. indication light, aluminum front edges on the shelves and table top with alu-line tech edge.

The vertical expansion profile 2
This profile is attached to the inside of the L-profile and is used to accommodate devices such as energy analyzers, complete 3-phase safety and switching units with low-profile 3-phase switching elements and much more. The profile makes it possible to accommodate the *acto* device range and thus opens up additional areas of application. The profile is used from the tabletop level upwards and can be extended below the tabletop to the floor.

Alternatively, it can combined with Expand profile 1 underneath the table top. Expanding profile 2 has a groove system that accommodates two cable chambers on the inside for optimum shielding. On the outside, the grooves are arranged in such a way that additional swivel arms can be attached to the outside of the table without colliding with other tables.

The front of the appliance is ergonomically inclined at a 45° angle both vertically and horizontally.

Note when using experiment frames For tables with 180° cable flap and 2-row experiment frame, the minimum height is 1700 mm. If cockpits are to be built above this, a correspondingly higher table height must be calculated.

Horizontal expansion profile 2

Expanding profile 2
horizontal between L-
profiles, below board /
cockpit.

Exemplary compilation
In combination with storage boards or 19-inch device cockpits, the aluminum channel becomes even more functional. It serves as a stable support structure for the board or cockpit. The horizontal expandable profile 2 provides more free space in the 19-inch cockpit thanks to its additional equipment capacity. It also serves as a static support element here. Its grooves on the flattened top and underside provide excellent connection options for additional system components such as soldering iron holders, perforated plates or shelves.

Expanding profile 2
horizontal across entire table width, on table top.

Workstation for training with
horizontal expandable profile 2 as
a table structure.

The horizontal expansion profile 2
Since its first presentation on the market in 1986, this system component was continuously developed and improved. This profile is a central component for all communication and technical work areas. The profile can be installed horizontally underneath storage boards or cockpits, individually between the L-profiles or as a table structure. It is also suitable for mounting under the table top, e.g. for an additional power supply. The aluminum channel can be connected to the powerful

19-inch insert panel range *acto* and alternatively with the *elneos six compact* device system. Thanks to the grooves on the top and bottom, the system offers many options for installing additional components. On request, separator plates can be positioned inside the trunking to separate data and power cables. The aluminum trunking has intelligent groove technology on the inside for the professional integration of all types of connections.

erfi-Bridge

Order note

The erfi-Bridge consists of two vertical (left and right) and one horizontal expansion profile 2.

Insert panel system acto®

The acto® insert panels as a system

The *acto* insert panel system is a protected brand of the erfi company and is characterized not only by its low height of 113 mm but also by its innovations.

Innovations of the acto system®

- Remote-controlled control power supply units (Ethernet, USB 2.0 and RS232-C optional)
- Remote-controlled function generators up to 20 MHz with integrated counters up to 100 MHz (Ethernet, USB 2.0 and RS232-C optional)
- Remote-controlled measuring devices (Ethernet, USB 2.0 and RS232-C optional)
- Outstanding performance and control data for power supply units and function generators (control accuracy < 2 mV/A, control speeds < 15)
- State-of-the-art software for networking of classrooms and development laboratories
- Module grid width in 19-inch slide-in technology in accordance with DIN 41494 Part 5

Technical dimensions

Installation height 113 mm
Installation width 7 TE grid width

Definition TE (dividing unit)

1 TE correspond to 2/10 inch (5.08 mm)
7 TE thus correspond to 35.56 mm

acto enables a high degree of module flexibility thanks to the 19-inch plug-in in accordance with DIN 41494 Part 5. Each insert panel is constructed in a grid of 7 HP and can therefore make optimum use of the available integration space. High packing densities can be achieved thanks to the narrow grid of 7 HP. The insert panels can also be easily combined with the large 19-inch highlab and basic device series in combi set-ups and combi cockpits.

All-current sensitive residual current circuit breaker (type B)

The erfi safety and switching units can alternatively be equipped with all-current sensitive residual current circuit breakers (type B). In the standard version, all models are equipped with pulse-current sensitive residual current circuit breakers (type A).

Possible smooth DC residual currents caused by frequency converters, inverters, photovoltaic systems and battery charging stations cannot be reliably detected by type A RCDs for sinusoidal AC residual currents and pulsating DC residual currents.

DC residual currents can to type A RCDs no longer guaranteeing the protective functions even with AC residual currents due to premagnetization of the transformer. The all-current sensitive RCDs (type B) reliably detect smooth DC fault currents and AC fault currents up to a frequency of 1 MHz.

DIN VDE 0100-723:2005-06 is binding for the protection of classrooms (when supplied with TN or TT systems) with experimental equipment.

If a TN or TT system used to supply experimental equipment, one or more residual current devices (RCDs) with a rated residual current $I_{\Delta N} \leq 30\text{mA}$ must be provided in these circuits. These residual current devices must be of type B.

All-current sensitive RCD type B (option)

also suitable for smooth direct currents;

Order no. **Z01.100.**

Safety and switching units

Safety and switching units, 49 TE

NFI switch: Residual current 30 mA, rated current 25 A
Emergency stop button: With potential-free contact for connection of an on-site room emergency stop

Safety and switching units with TFT display for switching socket outlets, 56 TE

Emergency stop button: With potential-free contact for connection of an on-site emergency room
Phase indicator lamp L1
Motor protection switch: 10-16 A with undervoltage release
TFT display For switching the individual sockets (groups)

Note on the switching unit: An empty plate with at least 56 HP is required for the contactors and relays!

- 1-phase**
Horizontal Order no. **A53.061**
Vertikal Order no. **A53.061V**

Safety and switching units

Safety and switching units, switchable and remote-controlled, 49 TE

- NFI switch:

Residual current 30 mA, rated current 25 A type B (pulse current sensitive)
- Key switch:

with 3 key positions for switching between low, zero and low, AC and three-phase voltage
- Emergency stop button:

with integrated key switch (tamper-proof)
with additional potential-free contact for room emergency stop
- LED display:

Indicator light for displaying the statuses.
For example:
Level I: green for low voltage
Level II: yellow for low, alternating and three-phase voltage

Phase indicator lamps: L1 or L1, L2, L3
Motor protection switch: 10-16 A with built-in undervoltage release

Note on the switching units: An empty plate with at least 56 HP is required for the 2 contactors or 1 contactor and 2 relays!

Supply modules

Isolating transformer 230 V / 3 A / 690 VA, 28 TE
1 illuminated mains switch, 1 socket outlet without earthing contact for drawing off floating AC voltage, 1 thermal-magnetic circuit breaker (secondary) and 1 thermal circuit breaker (primary)

Note: The isolating transformer is mounted in the cable tray or in a techcube underneath the table and wired accordingly.

Horizontal order no. A92.101 Vertical order no. A92.101V

Isolating transformer 230 V / 2 A / 460 VA, 28 TE
1 illuminated mains switch, 1 socket outlet without earthing contact for drawing off floating AC voltage, 1 thermal-magnetic circuit breaker (secondary) and 1 thermal circuit breaker (primary)

Note: The isolating transformer is mounted in the cable tray or in a techcube underneath the table and wired accordingly.

Horizontal order no. A92.026 Vertical order no. A92.026V

AC voltage module, floating, 230 V/max. 0.5 A, 115 VA, 35 TE
1 illuminated mains switch, 1 socket outlet without earthing contact for taking floating AC voltage, 1 thermal-magnetic circuit breaker (secondary) and 1 thermal circuit breaker (primary)

Horizontal order no. A92.020 Vertical order no. A92.020V

AC voltage module, floating, 230 V/max. 0.5 A, 115 VA, 28 TE
1 illuminated mains switch, 2 safety laboratory sockets for tapping earth-free alternating voltage, 1 thermal-magnetic switch Circuit breaker (secondary) and 1 thermal circuit breaker (primary)

Horizontal order no. A92.021 Vertical order no. A92.021V

1-phase AC power supplies Low-voltage AC module, floating, 12 V, 24 V/1 A, 35 HP
1 illuminated mains switch, 3 safety laboratory sockets for taking floating low AC voltage, 1 thermal circuit breaker (primary protection), 2 thermal circuit breakers (secondary protection)

Horizontal order no. A92.010 Vertical order no. A92.010V

1-phase AC power supplies Low-voltage AC module, floating, 6 V, 8 V, 12 V/1 A, 35 HP
1 illuminated mains switch, 4 safety laboratory sockets for taking floating low AC voltage, 1 thermal circuit breaker (primary protection) 3 thermal-magnetic circuit breakers (secondary protection)

Horizontal order no. A92.011 Vertical order no. A92.011V

Low AC voltage module, floating, 6 V, 12 V, 18 V, 24 V, 36 V, 42 V/3 A, 49 TE
1 illuminated mains switch, 4 safety laboratory sockets for taking floating low AC voltage, 1 thermal circuit breaker (primary protection), 3 thermal-magnetic circuit breakers (secondary protection)

Horizontal order no. A93.010 Vertical order no. A93.010V

Low AC voltage module, floating, 2 V, 4 V, 6 V, 8 V, 10 V, 12 V/10 A, 49 HP
1 illuminated mains switch, 4 safety laboratory sockets for taking floating low AC voltage, 1 thermal circuit breaker (primary protection), 3 thermal-magnetic circuit breakers (secondary protection)

Horizontal Order no. A93.011

Vertical Order no. A93.011V

Small three-phase voltage module, floating, Delta 3 x 17.3 V/150 VA, star 3 x 10 V/5 A, 56 TE
1 mains switch, 4 safety laboratory sockets L1, L2, L3, N for tapping floating low three-phase voltage, 1 thermal circuit breaker (primary fuse protection), 3 thermal-magnetic circuit breakers (secondary fuse protection)

Horizontal order no. A94.010 Vertical order no. A94.010V

Small three-phase voltage module, floating, delta 3 x 40 V, star 3 x 23 V/3 A, 56 HP
1 mains switch, 4 safety laboratory sockets L1, L2, L3, N for tapping floating low three-phase voltage, 1 thermal circuit breaker (primary fuse protection), 3 thermal-magnetic circuit breakers (secondary fuse protection)

Horizontal order no. A94.011 Vertical order no. A94.011V

Three-phase module, 35 HP
1 mains switch, 3 thermal-magnetic circuit breakers, 5 SLB¹ L1, L2, L3, N, PE, 400/ 230 V, 50 Hz, 16 A

Horizontal order no. A12.021 Vertical order no. A12.021V

Supply modules

Three-phase module, 28 HP
1 CEE socket outlet, 3-pin+ N+ PE, 6 h,400/ 230 V, 50 Hz, 16 A
Horizontal order no. A12.201 Vertical order no. A12.201V

CEE socket outlet (wired), 14 TE
2-pole+ PE, 6 h, 230 V, 50 Hz, 16 A, with blue hinged lid
Horizontal order no. A11.022 Vertical order no. A11.022V

Three-phase module, 28 HP
1 CEE socket outlet, 3-pin+ N+ PE, 6 h, 400 V / 230 V, 50 Hz, 16 A
5 SLB¹ L1, L2, L3, N PE, 400 V / 230 V, 50 Hz, 16 A
Horizontal order no. A12.057 Vertical order no. A12.057V

Three-phase module with multifunction display incl. power meter, 56 HP
U: Lx - N (V), I (A), P (W), Q (VAr), S (VA), cos phi (0.10 i .. 1 .. 0.10 c), f (L1-N : 48-62 Hz)
1 CEE socket outlet, 3-pin+ N+ PE, 6 h, 400/ 230 V, 50 Hz, 16 A, 5 SLB¹ L1, L2, L3, N, PE, 400/ 230 V, 50 Hz, 16 A
Horizontal order no. A14.055 Vertical order no. A14.055V

Three-phase module, 42 HP
1 CEE socket 400 V / 230 V, max. 16 A per phase
5 SLB¹ 400 V / 230 V, max. 16 A per phase
1 key-operated single push-button, 1 contactor
1 Off button
3 phase indicator lights

Horizontal order no. A13.038 Vertical order no. A13.038V

Notes: An empty plate with at least 28 HP is for the contactor!

Ddeer current module 16 A , 56 TE
1 CEE socket 400 V / 230 V, max. 16 A per phase
5 SLB¹ 400 V / 230 V, max. 16 A per phase, 1 key-operated single switch
1 off button, 3-way automatic circuit breaker
3 phase indicator lights
1 key switch, 1 contactor

Horizontal order no. A14.041 Vertical order no. A14.041V

Notes: An empty plate with at least 28 HP is for the contactor!

Three-phase module 32 A , 56 TE
1 CEE socket outlet, , 400 V / 230 V, 50 Hz, max. 32 A per phase
3-way automatic circuit breaker with undervoltage release,
3 phase indicator lights
Horizontal order no. A14.040 Vertical order no. A14.040V

Universal tester, remote-controlled

Universal tester with digital display, remote-controlled, 56 TE
With DC and AC power supply unit, function and three-phase generator, completely remote-controllable. Ideally suited for all basic experiments and advanced experiments in electrical engineering / electronics and digital and analog technology.

Horizontal Order No. A54.101 Vertical Order No. A54.101V

Note: An empty panel with at least 56 HP is required for the switching power supply unit! Alternatively, the output stage control power supply can be installed in the cable tray or in a techcube underneath the power supply. of the table and wired accordingly.

Technical data Universal tester with digital display, fully remote controllable		
Size	113 mm / 56 TE	
Display		
LED status display	for various function groups	
DC fixed voltage	Fixed voltage 1	12 V / 1 A, short-circuit proof
	Fixed voltage 2	+ 15 V / 2 A, - 15 V / 0.5 A, short-circuit proof
	Fixed voltage 3	+ 5 V / 2 A for TTL, short-circuit proof
DC control power supply unit	0 - 30 V / 0-2 A, stabilized and short-circuit proof, Current limitation adjustable via potentiometer, output OFF function	
AC fixed voltage	Fixed voltage 1	12 V, 700 mA, 50 Hz
	Fixed voltage 2	24 V, 700 mA, 50 Hz
3-phase alternator	with 3 phases+ N, amplitude: 3 x 7/12 V, current carrying capacity: 3 x 200 mA, Output voltage: 0...10 Vrms, conductor voltage 0-17, 4 Vrms (star/delta) Frequency: 1-120 Hz adjustable in 1 Hz steps	
Function generator	Functions	Sine, triangle, square wave, logic (digital) - TTL
	Frequency range	0.1 Hz - 1 MHz
	Amplitude	0-20 Vpp, accuracy 10 mV
	Max. Output current	300 mA
	Attenuator	20 dB
	Output resistance	50 Ohm, source resistance 5 Ohm
	TTL	5 V
Interfaces	USB and Ethernet, on the rear. Also available at the front on request.	
Fuses	Short-circuit-proof and intrinsically safe as well as self-resetting fuses on all outputs	

Variable transformers

	Equipment of the transformers All variable transformers are equipped with a thermal (primary) and thermal-magnetic (secondary) automatic circuit breaker and an illuminated mains switch.		0-260 V, AC/DC, 1 A, not floating, without display, 42 TE <i>unstabilized, DC:</i> 0-200 V DC unscreened, Residual ripple approx. 50 % due to integrated bridge rectifier <i>AC/DC output:</i> 3 SLB¹ 4 mm (L1, N and PE) / 2 SLB¹ 4 mm Horizontal order no. A93.030 Vertical order no. A93.030V Note: Cannot be used in expansion profile 2.
	0-30 V AC, 2 A, floating, 77 TE <i>unstabilized, output AC:</i> 2 SLB¹ 4 mm <i>Display:</i> 1st moving iron instrument Kl. 2.5; voltage: 0-30 V 2. moving iron instrument cl. 2.5; current: 0-2 A Horizontal order no. A95.010 Vertical order no. A95.010V		0-260 V AC, 1 A, not floating, without display, 35 TE unstabilized, <i>AC output:</i> 3 SLB¹ 4 mm (L1, N and PE) Horizontal order no. A92.030 Vertical order no. A92.030V Note: Cannot be used in expansion profile 2.
	0-30 V, AC/DC, 2 A, floating, 77 TE unstabilized, switchable to 0-24 V DC Residual ripple approx. 50 % due to integrated bridge rectifier <i>AC/DC output:</i> 2 SLB¹ 4 mm <i>Display:</i> 1st moving iron instrument Kl. 2.5; voltage: 0-30 V 2. moving iron instrument cl. 2.5; current: 0-2 A Horizontal order no. A95.011 Vertical order no. A95.011V		0-260 V AC/DC, max. 2 A, floating, 63 TE unstabilized, switchable to 0-200 V DC by bridge rectifier <i>Output AC / DC:</i> socket without earthing contact / 2 SLB¹ 4mm <i>Display:</i> 1. moving iron instrument Kl. 2.5, current: 0-260 V 2. moving iron instrument cl. 2.5, current 0-2 A Horizontal Order No. A94.032 Vertical Order No. A94.032V Note: Not applicable in expansion profile 2, energy superstructures / cockpits 150 mm deep.
	0-260 V AC, 1 A, not floating, earthed, 63 TE <i>unstabilized, AC output:</i> socket outlet with earthing contact <i>Display:</i> 1st moving-iron instrument, terminal 2.5; voltage: 0-260 V 2. moving iron instrument cl. 2.5; current: 0-1 A Horizontal order no. A94.030 Vertical order no. A94.030V Note: Cannot be used in expansion profile 2.		0-12/24/260 V, AC/DC, floating or non-floating, 56 TE unstabilized, <i>AC 1:</i> 0-12 V AC max. 12 A floating <i>AC 2:</i> 0-24 V AC max. 6 A floating <i>AC 3:</i> 0-260 V AC max. 2 A not floating <i>Output AC 1+2:</i> 2 SLB¹ 4 mm each <i>Output AC 3:</i> 3 SLB¹ 4 mm (L1, N and PE) Bridge rectifier for external wiring Horizontal order no. A94.033 Vertical order no. A94.033V Note: Not applicable in expansion profile 2, energy superstructures / cockpits 150 mm deep.
	0-24 V, AC/DC, 4 A, floating, 77 TE unstabilized, switchable to 0-19 V DC Residual ripple approx. 50 % due to integrated bridge rectifier <i>Output AC / DC:</i> 2 SLB¹ 4 mm <i>Display:</i> 1st moving iron instrument Kl. 2.5; voltage: 0-30 V 2. moving iron instrument cl. 2.5; current: 0-4 A Horizontal order no. A95.012 Vertical order no. A95.012V		0-6/18/42/260 V, AC/DC, floating or non-floating, 56 TE unstabilized, <i>AC 1:</i> 0-6 V AC max. 15 A floating <i>AC 2:</i> 0-18 V AC max. 6 A floating <i>AC 3:</i> 0-42 V AC max. 3 A floating <i>AC 4:</i> 0-260 V AC max. 2 A not floating <i>Output AC 1-3:</i> 2 SLB¹ 4 mm each <i>Output AC 4:</i> 3 SLB¹ 4 mm (L1, N and PE) Bridge rectifier for external wiring Horizontal Order No. A94.031 Vertical Order No. A94.031V Note: Cannot be used in expansion profile 2.

Fixed voltage sources

Technical data series-regulated fixed voltage sources							
Output data	Tension	5 V	5 V	12 V	12 V	15 V	15 V
	Electricity	1 A	3 A	1 A	2 A	1 A	2 A
Control deviation	Voltage load change 0-100%	20 mV	20 mV	50 mV	80 mV	50 mV	80 mV
Ripple	Voltage at rated load 0.5 m _{Vrms}						
Settling time	Load jump from 0% to 100% 15 µs						

Tracking power supply unit ±3 to ±15 V / 1 A and 5 V / 1 A, 42 HP
permanently longitudinally regulated, permanently short-circuit-proof, can be connected in series and parallel
Outputs: SLB¹ 4 mm

Horizontal order no. A23.050 Vertical order no. A23.050V

Fixed voltage source 3.3 V / 4 A, 28 TE
Switched, permanently short-circuit-proof, can be connected in series and parallel, double the nominal peak power when switched on Power factor and harmonics to EN61000-3-2
Outputs: SLB1 4 mm
Fuse protection: 1 thermal-magnetic circuit breaker
Horizontal order no. A22.100 Vertical order no. A22.100V

Fixed voltage source 5 V / 3 A, 35 TE

Longitudinally regulated, permanently short-circuit-proof, can be connected in series and parallel
Outputs: SLB¹ 4 mm
Horizontal Order no. A22.050 Vertical Order no. A22.050V

Fixed voltage source ±5 V/3 A, 56 TE
Longitudinally regulated, permanently short-circuit-proof, can be connected in series and parallel
Outputs: SLB¹ 4 mm
Horizontal order no. A24.050 Vertical order no. A24.050V

Fixed voltage source 24 V / 4 A, 56 TE
Clocked, permanently short-circuit-proof, can be connected in series and parallel
Outputs: SLB¹ 4 mm
Fuse: Thermal-magnetic appliance circuit breaker, 4 A
Horizontal order no. A24.064 Vertical order no. A24.064V

Fixed voltage source 24 V / 5 A (10 A peak), 56 TE clocked, permanently short-circuit-proof, can be connected in series and parallel, double nominal peak power when switched on Power factor and harmonics in accordance with EN61000-3-2 *Load regulation:* 192 mV max.
Ripple and noise: 360 mV max.
Outputs: SLB¹ 4 mm
Horizontal order no. A24.051 Vertical order no. A24.051V

Fixed voltage source 2 x 12 V/2 A, 63 TE
permanently short-circuit-proof, parallel or series-connectable, longitudinally regulated
Outputs: SLB¹ 4 mm
Horizontal order no. A24.052 Vertical order no. A24.052V

Fixed voltage source 2 x 15 V / 2 A, 63 TE
permanently short-circuit-proof, longitudinally regulated, can be connected in series and parallel
Outputs: SLB¹ 4 mm
Horizontal order no. A24.053 Vertical order no. A24.053V

Fixed voltage source ±12 V / 1 A and 5 V / 3 A, 70 TE permanently short-circuit-proof, longitudinally regulated, can be connected in series and parallel 1 additional 230 V / 16 A socket outlet with earthing contact
Outputs: SLB¹ 4 mm
Horizontal order no. A25.050 Vertical order no. A25.050V

Note: Cannot be used in expansion profile 2.

Fixed voltage source ±15 V / 1 A and 5 V / 3 A, 70 TE permanently short-circuit-proof, longitudinally regulated, can be connected in series and parallel 1 additional 230 V / 16 A socket outlet with earthing contact
Outputs: SLB¹ 4 mm
Horizontal Order No. A25.051 Vertical Order no. A25.051V

Note: Cannot be used in expansion profile 2.

Switch-mode power supply - /+ 5 V / 3 A, - /+ 12 V / 1.3 A, - /+ 15 V / 1 A, 56 TE clocked, permanently short-circuit-proof, can be connected in series and parallel, double the nominal peak power when switched on Power factor and harmonics in accordance with EN61000-3-2
Outputs: SLB¹ 4 mm
Horizontal order no. A24.058 Vertical order no. A24.058V

Remote-controlled regulating power supply units (DC)

Technical data Remote-controlled regulating power supply units (DC)		
Output data	permanently short-circuit-proof, longitudinally regulated, can be connected in series and parallel	
Control deviation load change 0-100%	Voltage 2 mV/A	Current 0.02 mA/V
Temperature coefficient	Voltage 0.005%/K	Current 0.013 %/K
Ripple	Voltage 0.2 mV _{rms}	Current 0.2 mA _{rms}
Settling time	Load jump from 0% to 100% 15 µs	Load jump from 100% to 0% 500 µs
Ramp generator	for any voltage curves	
Ramp parameters	Start and end voltage, speed, duration per ramp step, number of cycles	
Outputs	4 mm safety laboratory sockets	
Interfaces (optional)	Ethernet, USB 2.0, RS232-C	

Rear interfaces (option)

The interfaces enable the control of the control power supply units.

The erfi software *highlink Power* takes over the complete device control as well as the room control via Ethernet interface.

Ethernet, order no. NWT.1.106
USB 2.0, order no. NWT 1.107
RS 232 C, order no. NWT 1.108

Installation instructions

The output stage of the power supply unit is mounted in the cable tray or in a techcube underneath the table and wired accordingly.

Single regulating power supply 0 - 30 V / 0 - 2 A, 49 TE

A digital display for voltage and current;
OUTPUT-OFF: Enables the deactivation of the output with simultaneous limitation of the max. output current (visualized in the display).

Horizontal order no. A23.015

Vertical order no. A23.015V

Single regulating power supply 0 - 30 V / 0 - 2 A, 49 TE

Two digital displays for voltage and current;
OUTPUT-OFF: Enables the deactivation of the output with simultaneous limitation of the max. output current (visualized in the display).

Horizontal order no. A23.025

Vertical order no. A23.025V

Double regulating power supply 2 x 0 - 30 V / 2 x 0 - 2 A, 98 TE

Two digital displays for voltage and current.
OUTPUT-OFF: Enables the deactivation of the output with simultaneous limitation of the max. output current (visualized in the display).

Horizontal order no. A27.015

Vertical order no. A27.015V

Double regulating power supply 2 x 0 - 30 V / 2 x 0 - 2 A, 98 TE

Four digital displays for voltage and current.
OUTPUT-OFF: Enables the deactivation of the output with simultaneous limitation of the max. output current (visualized in the display).

Horizontal order no. A27.025
Vertical order no. A27.025V

Programmable laboratory power supply 50 V / 5 A, 56 HP

Output voltage, current and power adjustable (0 - 50 V, 0 - 5 A). High resolution for current and voltage setting: 1 mA or 10 mV. Parameter memory for switch-off values (limit values). 10 data memories for presets, 3.65 cm color display. Clear display of set and actual values, operating states, limit values. Key lock and automatic recall of the last settings when switching on.

Horizontal order no. A24.101

Vertical order no. A24.101V

Energy units

Interface and connection panels

RC decade, 42 TE
Combination device with integrated R and C decade for experimental determination of resistance and capacitance values. *Discharge circuit:* push-button with changeover switch and discharge resistor 10 kOhm *Resistance:* 1 Ohm to 999.999 kOhm in steps of 1 Ohm
Accuracy:
 $\pm 1\%$ above 40 Ohm $\pm 4\%$ from 40 Ohm to 13 Ohm
 $\pm 6\%$ from 12 Ohm to 3 Ohm $\pm 10\%$ at 2 Ohm and 1 Ohm
Load capacity max. 1 W / voltage max. 250 V (50 Hz) *Capacitance:* 100 pF to 9,9999 μ F in steps of 100 pF *Accuracy:* $\pm 2\%$ over 1 nF
 $\pm 10\%$ from 1 nF to 100 pF

Horizontal order no. **A13.050** Vertical
order no. **A13.050V**

RC-Logade, 28 TE
For the experimental determination of resistance and capacitance values. The resistance and capacitance can be set using a rotary switch.
Resistance: 100 Ohm to 680 kOhm Series E 6
Tolerance $\pm 2\%$ / load capacity max. 0.5 W / voltage max. 400 V DC
Capacitance: 100 pF to 680 nF Series E 6
Tolerance $\pm 10\%$ / voltage max. 250 V DC

Horizontal order no. **A12.050** Vertical
order no. **A12.050V**

L-Logade, 14 TE
For the experimental determination of inductance values. The inductance can be set using a rotary switch.
Value range: 1 to 4700, graded according to series E 6 (23 values)
Accuracy: 1 μ H to 33 μ H $\pm 10\%$, 47 μ H to 4700 μ H $\pm 5\%$
Voltage max. 100 V DC / current max. 63 mA, protected by miniature fuse

Horizontal order no. **A11.050**
Vertical order no. **A11.050V**

Continuity tester optical and acoustic, 28 TE
Visually via green light field for low-impedance resistors, acoustically via loudspeaker for high-impedance resistors
Horizontal order no. **A12.060**
Vertical order no. **A12.060V**

2 SubD connectors, 9-pin, 7 HP
incl. cable 1.8 m and mating socket
Horizontal order no. **A10.003**
Vertical order no. **A10.003V**

1 SubD socket, 25-pin, 7 HP
incl. cable 1.8 m and mating socket
Horizontal order no. **A10.004**
Vertical order no. **A10.004V**

1 DVI socket, 7 TE
incl. cable 1.8 m and mating socket
Horizontal order no. **A10.022**
Vertical order no. **A10.022V**

PC multimedia socket, 14 TE
3 x USB port,
2 x audio jack socket 3.5 mm, 1x multimedia card reader (SD, MMC, SDHC, MS, MS pro, MS duo, MS produo) incl. cable 1.8 m
Horizontal order no. **A11.202**
Vertical order no. **A11.202V**

Safety laboratory socket PE, 7 TE
Protective conductor wired, 1 SLB¹ 4 mm
Horizontal order no. **A10.045** Vertical
order no. **A10.045V**

Insert plate Earthing bolt, 14 HP
3 x POAG earthing bolts
Horizontal order no. **A10.102** Vertical
order no. **A10.102V**

USB C charging socket up to 100 W, 7 TE
Horizontal order no. **A10.160**
Vertical order no. **A10.160V**

4-port USB hub, 7 TE
4-port USB port, USB 3.1
Horizontal order no. **A10.154**
Vertical order no. **A10.154V**

1 socket for mains plug, 7 TE for plug type C13:
Horizontal order no. **A10.161**
Vertical order no. **A10.161V**
for plug type C19:
Horizontal order no. **A10.162**
Vertical order no. **A10.162V**

RFID insert plate, 14 TE
For table release, incl. transponder chip (key fob)
Horizontal order no. **A11.201**
Vertical order no. **A11.201V**

Sash clamp PE, 7 TE
Sash terminal with SLB¹ wired to PE 4 mm²
Horizontal order no. **A10.058**
Vertical order no. **A10.058V**

Front panel for status display of the DK 4 / DK 10 dual permanent monitoring system Front panel for optional integration of the visual status display of the DK 4 / DK 10 dual permanent monitoring system, see + accessories page 378
Horizontal order no. **A13.095**, 14 HP
Vertical order no. **A13.095V**, 21 HP

Modular interface panels

Modular interface panels

The modular interface panels consist of a base plate for mounting interface modules including mounting adapters.

Base plate mounting 1 interface module, 7 HP
Horizontal order no. A10.200
Vertical order no. A10.200V

Base plate incl. mounting adapter for interface modules

Interface modules for base plate - these must be ordered separately!

Base plate mounting 2 interface modules, 7 HP horizontal Order no. A10.201
Vertical Order No. A10.201V

Modules for interface fields

each incl. cable 1.8 m and mating connector

RJ45 feed-through socket Cat. 6A
order no. M.001

USB A 3.0 feed-through socket
order no. M.002

USB A 3.0 to B socket
order no. M.003

USB B feed-through socket
order no. M.004

USB C feed-through socket
order no. M.005

USB A charging socket (suitable for base plate A10.200 / A10.200V), order no. M.009

USB C charging socket 5 V / 2.1 A (suitable for Base plate A10.200 / A10.200V), order no. M.010

Fiber optic module LC duplex feed-through socket order no. M.011

Fiber optic module SC Simplex feed-through socket order no. M.012

HDMI feed-through socket
order no. M.006

Display port feed-through socket
order no. M.007

Mini display port socket to plug order no. M.008

FireWire-IEE 1394 feed-through socket
order no. M.013

BNC feed-through socket
order no. M.014

F-through bushing
order no. M.015

IEC socket to F socket
order no. M.016

IEC plug to F socket order no. M.017

Insert plates

Empty plates

The unprinted blank panels in fixed size units are designed for both vertical and horizontal installation.

Empty plates

Vertical order no. A11.203V

Ø 80 mm
Horizontal order no. A11.204
Vertical order no. A11.204V

erfi-Didactic for educational institutions
The insert boards of the erfi-Didactic series are useful for all assemblies in the training sector.

Safety rules for didactics, 28 TE
Front panel with 5 important safety rules for electronics laboratories. Black lettering on a yellow background.

Horizontal order no. A12.139 Vertical order no. A12.139V

ASi, 14 TE
4 SLB¹ 4 mm yellow, unwired, "ASi logo" imprint

Horizontal order no. A11.149 Vertical order no. A11.149V

KNX, 7 TE
2 SLB¹ 2 mm red / black, unwired, "KNX logo" imprint

Horizontal order no. A10.127 Vertical order no. A10.127V

PROFI BUS, 7 TE
2 Sub-D adapters (Genter changer) 9-pin, front female / rear female, "PROFI-BUS" imprint

Horizontal order no. A10.129 Vertical order no. A10.129V

PROFI NET, 7 TE
2 RJ45 socket 8-pin pluggable on both sides, 3 m patch cable, "PROFI-NET" imprint

Horizontal order no. A10.128 Vertical order no. A10.128V

PC-USB oscilloscope, 42 TE
2- channel, 16 digital channels, 25 MHz, 200 MS/s, USB interface at the rear.
Spectrum analyzer, function generator, arbitrary waveform generator with serial bus analyzer.

Horizontal order no. A27.028 Vertical order no. A27.028V

Dreturn air outlet, 7 TE
*A*Outlet: KD 3, DN 5 self-regulating / KD 4, DN 7.2 self-canceling
*B*Operating pressure: Max. 10 bar
Inlet: Rear for hose, Ø 8 mm outside

with KD 3 coupling, DN 5: Horizontal order no. A70.101 Vertical order no. A70.101V

with KD 4 coupling, DN 7.2: Horizontal order no. A70.103 Vertical order no. A70.103V

Pneumatic unit with pressure gauge
Output pressure for clutch:
0 to 10 bar, continuously adjustable, Pressure reducer with locking device and overpressure protection
Outlet: Coupling KD 3, DN 5 self-regulating / KD 4, DN 7.2 self-adjusting
Inlet: Rear for hose, Ø 8 mm outside
Display: Pressure gauge

with KD 3 coupling, DN 5: Horizontal order no. A72.017, 35 TE Vertical order no. A72.017V, 42 TE

with KD 4 coupling, DN 7.2: Horizontal order no. A72.140, 35 TE Vertical order no. A72.140V, 42 TE

Pneumatic unit with pressure gauge
Output pressure for clutch 1 and 2:
0 to 10 bar, continuously adjustable, Pressure reducer with locking device and overpressure protection
Output pressure for clutch 3:
Direct tapping of the inlet pressure
Outlet: All 3 couplings KD 3, DN 5 self-regulating / KD 4, DN 7.2 self-adjusting
Inlet: Rear for hose, Ø 8 mm outside
Display: Pressure gauge

with KD 3 couplings, DN 5: Horizontal order no. A72.111, 35 TE Vertical order no. A72.111V, 42 TE

with KD 4 couplings, DN 7.2: Horizontal order no. A72.012, 35 TE Vertical order no. A72.012V, 42 TE

Pneumatic units

Pneumatic unit with pressure gauge
Output pressure for clutch 1 and 2:
0 to 10 bar, continuously adjustable,
Pressure reducer with locking device and overpressure protection
Output pressure for clutch 3:
Direct tapping of the inlet pressure
Outlet: All 3 couplings KD 3, DN 5 self-regulating / KD 4, DN 7.2 self-adjusting
Inlet: Rear for hose, Ø 8 mm outside
Display: Pressure gauge
Shut-off valve: 1x central shut-off valve

with KD 3 coupling, DN 5: Horizontal order no. A73.104, 35 TE Vertical order no. A73.104V, 42 TE

with KD 4 coupling, DN 7.2: Horizontal order no. A73.103, 35 TE Vertical order no. A73.103V, 42 TE

Pneumatic unit
For direct extraction of vacuum and compressed air, 10 bar
Output: Vacuum: 2 fixed outputs
Compressed air: 1 fixed output
All 3 couplings KD 3, DN 5 self-regulating / KD 4, DN 7.2 self-canceling
Inlet: Rear for hose, Ø 8 mm outside
Shut-off valve: 1 x for vacuum
1 x for compressed air

with KD 3 coupling, DN 5: Horizontal order no. A73.102, 35 TE Vertical order no. A73.102V, 42 TE

with KD 4 coupling, DN 7.2: Horizontal order no. A73.101, 35 TE Vertical order no. A73.101V, 42 TE

Solder fume extraction, 14 TE
With bulkhead fitting for the BMM hose
Horizontal Order No. A71.103
Vertical Order No. A71.103V

Shut-off valve, 28 TE
Shut-off valve for compressed air module
Horizontal order no. A72.130
Vertical order no. A72.130V

Soldering

Soldering station 80 W with digital display
– Electronic control electronics
– Temperature ranges 50 °C to 450 °C, adjustable via buttons
– 3-digit digital display for actual and setpoint value
– Tolerance +/- 2% of final value
– Automatic tool recognition
– External input device (WCB 1/ WCB 2, optional) can be connected for time and locking position.
– Potential equalization (basic state hard earthed)

Scope of delivery: Incl. soldering pencil WSP 80 and holder WPH for WSP 80

Horizontal order no. A13.060, (42 TE)
Vertical order no. A13.060V, (35 TE)

for 1 workstation
Table-top solder extraction unit
• Fully-fledged filter unit
• Efficient particle and gas filtration
• Odor elimination for individual workstations
• Simple filter change
• Filter status indicator (green/red light)
• Powerful fan / adjustable suction power
• Compact design, easy to move
• Stackable with all soldering station brands (max. footprint 13 cm x 18 cm)
• Can be connected to Weller soldering stations
• Illuminated work area
• ESD-safe

Technical data
Size (L x W x H): 270 x 212 x 110 mm
Power: 20 W
Capacity: 32 m³/h
Max. Vacuum: 490 PA
Noise level: 50 dBA (59 dBA at full power)

Order no.: ELH1.600

for 1-2 workstations
Solder fume extraction 2
• 2 upright ESD extraction arms, Ø 50 mm, length 650 mm for table mounting
• Fixing by means of a mounting plate flush with the tabletop - the extraction arms can be removed at any time for a free, even surface
• Installation cable and table bracket
• Display for blocked filters
• Incl. remote control for air flow regulation
• ESD-safe

Technical data
Size (L x W x H): 260 x 260 x 420 mm
Weight: 10 kg
Filter: Granulated carbon gas filter - ACF
99.997% HEPA filtration
Power: 140 W
Capacity: 180 m³ / h (106CFM)
Noise level: Under 55db (at normal operating speed)

Order no.: ELH1.680

Direct / piston extraction

for 1-2 workstations (for 2 FE soldering irons)

Compressed air solder fume extractor 3

- For under-sink mounting
- Maintenance-free compressed air converter
- For continuous industrial operation
- A compressed air cleaning filter also removes odors caused by compressed air
- ESD-safe

Technical data

Size (L x W x H):	140 x 140 x 200 mm
Weight:	2.7 kg
Filters	Compact filter Particle filter H13, broadband gas filter (50 % activated carbon + 50 % Chemisorb)
Performance:	6 bar
Capacity:	30 m³ / h
Air consumption:	30 l / min
Max. Vacuum blower:	20,000 Pa
Noise level:	< 39 dB(A) (distance 1 m)

Order no.: ELH1.640

for 1-2 workstations (for 2 FE soldering irons)

Electric solder fume extractor 4

- Suitable for under-sink installation
- Electric vacuum pump
- 2 power levels
- Portable device for central use, with built-in pump (*not for continuous operation*)
- Maintenance-free capacitor motor with integrated thermal fuse (overload protection)
- ESD-safe

Technical data

Size (L x W x H):	140 x 140 x 295 mm
Weight:	4 kg
Filters	Compact filter Particle filter H13, broadband gas filter (50 % activated carbon + 50 % Chemisorb)
Power:	70 W
Capacity:	50 m³/h
Max. Vacuum blower:	30,000 Pa
Noise level:	< 45 dB(A) (distance 1 m)

Order no.: ELH1.650

Power:	530 VA
Max. Vacuum blower:	10,000 Pa
Noise level:	< 51 dB(A) (distance 1 m)
USB port:	For firmware updates, Performance tests, data logging

Order no.: ELH01.630

for up to 20 workstations

Suction unit with pipe system 5

- Electronically controlled, maintenance-free turbine generates the required negative pressure
- 4 castors for increased flexibility of the unit
- Use with a pipe system of up to 200 m (7874 in)
- Compatible nozzle WX
- ESD-safe

Technical data

Size (L x W x H):	450 x 450 x 695 mm
Weight:	approx. 45 kg
Filters	Compact filter Particle filter H13, broadband gas filter (50 % activated carbon + 50 % Chemisorb)

Surface extraction

for 1-2 workstations

Solder fume extraction 6

- For continuous operation in industrial environments
- Maintenance-free brushless EC turbine
- F7 fine dust pre-filter and extra-large HEPA H13 filter surface with 2.4 m² for particularly long filter service life
- Adjustable suction power
- Automatic filter change notification system
- Portable suction unit
- Compatible nozzle WX WT

Technical data

Size (L x W x H):	335 x 330 x 445 mm
Weight:	9 kg
Filter:	Compact filter particle filter H13 and granular activated carbon filter
Power:	120 W
Capacity:	190 m³ / h
Max. Vacuum blower:	3,000 Pa
Noise level:	<50 dB(A) (distance 1 m)

Scope of delivery

- Suction unit for 1-2 workstations
- 1 suction arm (approx. 1 m) with suction hose approx. 3 m, shut-off valve with table attachment, remote switch and funnel nozzle

Note: 2nd hose for 2nd workstation must be ordered separately!
Order no.: ELH1.660

Order no.: ELH1.620

Accessories suitable for solder fume extraction 6 and 7

Suction arm

1 suction arm (approx. 1 m) with suction hose approx. 3 m, shut-off valve with Table mounting, remote switch and funnel nozzle.

Order no.: ELH1.660

for 2-4 workstations

Solder fume extraction 7

- Constant Flow Control (CFC) function: Optimally regulated extraction for each individual workstation
- Electronic filter control (optical and acoustic)
- 4 castors for increased flexibility of the unit
- Compatible nozzle WX WT
- ESD-safe

Technical data

Size (L x W x H):	345 x 325 x 505 mm
Weight:	19 kg
Filter:	Compact filter particle filter H13, broadband gas filter (50 % activated carbon / 50 % potassium permanganate)
Power:	275 VA
Capacity:	230 m³ / h
Max. Vacuum blower:	3,800 Pa
Noise level	< 48 dB(A) (distance 1 m)
USB port:	For firmware updates, power Performance tests, data logging
RS232 port:	For remote control by a PC, optionally with remote control

Scope of delivery

- Suction unit for 2-4 workstations
- 2x flexible Easy-Click 60 suction arm with funnel nozzle, throttle valve, table clamps

Order no.: ELH1.610

Stand suction arm

1 suction arm with stand arm, funnel nozzle (W x H): 230 x 100 mm) and butterfly valve with table clamps. Flexible extraction arm, length: 0.7 m. Suction hose 3 m.

Order no.: ELH1.670

Expansion profile 3

The vertical and horizontal expandable profile 3 In addition to the expandable profiles 1 and 2, the expandable profile 3 accommodates additional media. It is available in 2 sizes. Particularly large cable quantities (size 1) or medium-sized cable quantities (size 2) can be stowed in the table construction to save space. The profile system is accessible from the front or rear, depending on the installation, and allows wiring between the tables at any height. The system can of course also be used without the vertical expansion profiles.

- Horizontal alignment:** The horizontal alignment enables horizontal media routing and the connection of the two vertical left and right expander profiles.
- Special properties**
- **Size 1:** System height 90 mm, system depth 185 mm
 - **Size 2:** System height 40 mm, system depth 60 mm
 - Can be docked onto the rear of the L-profile and is height-adjustable
 - Useful under storage shelves and appliance cockpits

- Vertical alignment:** The vertical alignment of the Expand profile 3 extends the L-foot profile to the rear and thus ensures extended and intelligent media guidance in the vertical plane.
- Special properties**
- **Size 1:** System width 90 mm, system depth 185 mm
 - **Size 2:** System width 40 mm, system depth 60 mm
 - Side brush cover over the entire height
 - Metal rear panel
 - Internal holder for cable sorting (optional)
 - Can be docked to the rear of the L-profile
 - Kink-free media entry in all directions
 - Exterior with side finish can be veneered

Internal holder for cable sorting (optional) **Order no.:** ELC2.14.KS

Ordering information: Please replace the "x" with the desired mounting position L= left, R= right or LR= left and right.

Container program

The elneos® connect container program

The *elneos connect* container program differs from other container systems in the following key advantages:

1. Smart close technology fitted as standard;
2. Special chassis for maximum stability;
3. Roll container can be converted into a hanging container at any time;
4. High-quality design castors with $\varnothing$ 75 mm and improved running properties: 200 kg static load per castor, 100 kg dynamic load per castor;
5. Material tray with improved division and usable height 40 mm

Special features

1. Smart close technology

elneos connect offers Smart Close technology as standard. When closing, the drawer is slowed down over the last few centimeters and glides gently into its final position without hitting the floor.

2. Touch-to-open technology

With touch-to-open, all you have to do is press lightly on the front and the drawer opens. After the opening process, you decide for yourself how wide the drawer should be open. Touch-to-open makes container handles and side handles superfluous. The panels are smooth on all sides and offer maximum safety. Even when the drawers are open, the risk of injury is minimized as there are no protruding edges or corners.

3. Electronic central locking optional

On request, the containers are available with electronic central locking (transponder technology).

4. Roll container with special chassis

For special requirements in classrooms or in harsh industrial environments, *elneos connect* mobile pedestals have a reinforced metal chassis as standard. This reliably prevents the castors from tearing out.

Wide range of variants

- Mobile pedestals - wall-mounted pedestals - free-standing pedestals, each in system widths 430 mm and 330 mm
- 19-inch base cabinets - PC base cabinets

Technical versions

- All models also available in a conductive version.
- Body made of directly coated chipboard with a high-quality look and low noise levels.
- Equipped with steel drawers for organization.
- Top drawer with particularly high insert for writing utensils (40 mm) and significantly improved partitioning as standard; front height 1 U (U = height unit, 1 U = 50 mm).
- Drawer front heights from 2 U to 6 U.
- Suspended pedestal can be mounted at any position on the aluminum table frame.
- All wall units are equipped with a stop control function (only one drawer can be pulled out at a time).
- All mobile pedestals have a Stop-Control-Plus function. This function ensures that only one drawer can open if a door threshold or similar is crossed. The drawers are locked in a tamper-proof manner. This prevents them from falling over unintentionally.
- Drawers with a front height of 6 U are fitted with full-extension runners as standard.
- Drawer usable depth 490 mm, alternatively 690 mm
- High-quality full-extension drawer runner, 4 ball bearings, available for every drawer incl. self-cleaning function for a long service life.

Handles for containers

Bow handle, black

Serie

Side handle profile strips left and right, Anodized aluminium ELCCS2

ergonomic functional handle graphite black (RAL 9011) ELCCS1

Ergonomic functional handle blue (NCS-S-1565-B) ELCCS3

Ergonomic functional handle elneos green (RAL DESIGN 1107070) ELCCS4

Ergonomic functional handle zinc yellow (RAL1018) ELCCS5

Mobile pedestal ELC.6.1.544.C.1, optionally with ergonomic functional handles in elneos green, order no. ELCCS4.

Mobile pedestal ELC.6.1.544.C.1, optionally with touch-to-open, Order no.: EL6.9.3.

Mobile pedestal ELC.6.1.544.C.1, optionally with handle profile strips on the side left and right, anodized aluminium, order no. ELCCS2.

Mobile pedestal ELC.6.1.544.C.1, with bow handles as standard, black.

Roll container

- The main advantages**
- Touch-to-open (opens with light pressure)
 - Special trolley and 75 mm design rollers with very good running characteristics
 - Convertible to hanging container
 - Improved material tray
 - Continuous top plate

Please replace the „x“ in the order number with the desired decor of the container.

Room control software highlink® Power

The company's own software package *highlink Power* has been on the market since 1990 and over 3,000 licenses have been sold since then. The software is constantly being further developed and a special feature is the visualization of erfi device functions and

the status of the laboratory benches and rooms. The *highlink Power* software package is a modern tool that is used in both education and industry.

Fig. above: Status display of each table including measured value displays. Fig. middle right: Table configuration Fig. bottom right: Status display of the

Visualization of the laboratories

Thanks to the powerful software package, your laboratory rooms can be visualized within a very short time (see main screen image) and you can record all laboratory conditions at a glance. The experienced room plan manager allows you to freely select rooms for more extensive objects. If required, this package also allows you to access rooms in other buildings.

Interfaces

- The software works web-based, alternatively locally.
- Useful interfaces can be created to the *CANDY Power and Assembly Workflow Management (AWM)* software packages.
- MQTT interface
- OPC UA

Control and adjust the digital multi-meters on various laboratory benches.

highlink® Power Room and device display

- Representation of a photorealistic 3D room layout
- Background freely selectable through fade-in graphics
- Photorealistic device display
- Freely programmable graphic room layout, enabling immediate status recording of all laboratory benches
- Multi-level color concept

highlink® Power Laboratory Room Manager

Individual room plans can be selected and controlled remotely for extensive building facilities thanks to the networking. All necessary functions of the respective room can be set from the central workstation control (teacher / laboratory manager).

- Free room configuration with regard to name, number of tables, IP assignment and the devices defined for each table
- Comprehensive assignment of user rights per table and device
- Remote control of all device groups and functions
- Password management for individual access rights
- Table group formation
- State-of-the-art network technology (LAN, WLAN, ...)
- Control and release of individual function groups:
 - General release
 - 50 V / 230 V / 400 V / PC mains and much more.
 - Retractable and swivel tables
- Visualization of all states:
 - Release granted or not granted
 - 50 V / 230 V / 400 V release / PC network and much more.
 - Position of the lowering and swivel tables
 - Emergency stop function
- Individual control of the individual workstations from the trainer and laboratory manager workstation

highlink® Power Fault Manager

- Recognize faults / avoid operating errors

highlink® Power data management

- Dashboard
- Professional measurement data logging with integrated reporting generator
- Measurement data display in SQL database
- Recording and playback function of the measurement curves
- Simulation of expected measurement curves (target/actual)
- Limitation of setting ranges for individual workstations
- Visualization and transfer of individual screen contents to any number of workstations
- Automated test sequences for sequential test steps

highlink® Power in training

- Any number of test sequences / parameterizations can be saved / retrieved per student station (laboratory station configurator)
- Student-related assessment for individual experiments
- Optimum lesson planning thanks to time-controlled parameterization of all functions (immediate start of lessons / optimum use of time)
- Increased learning quality
- Outstanding didactic teaching qualities
- Digital work tasks
- Manual and automated measuring sequences
- Indication of work instructions
- Programming of experiments
- Logging of test data and results
- Flow table

highlink® Power and erfi Didactic

Holistic concept through elegant integration of the erfi teaching aid systems from the *erfi Didactic* program and the teaching aids from *Festo Didactic SE*.

- Automation technology with *Logo!* and *S7*
- Building automation
- User administration
- Ipad integration/touch panel PC
- Test systems and statistics, and much more.

highlink® Power test timer

The test timer allows you to define a clear time limit for a test situation. A freely editable timer and an assignable device function or voltage disconnection enable a clear time limit. The timer counts down visibly as a countdown. Once the test time has elapsed, the system automatically switches off the laboratory benches with the selected voltage levels or deactivates the device functions and blocks access to them.

Room control software highlink® Power

Room control by means of targeted release of individual laboratory tables.

Simultaneous detailed adjustment of the control power supplies on all laboratory benches.

Activation and control

In addition to the usual 230 V and 400 V power supply, modern laboratory benches have modern DC power supplies (low voltages) and measuring devices with intelligent functions. These individual device and function groups can be elegantly controlled. The up/down movement of the lowering and swivel tables also be conveniently controlled from the teacher's desk at the touch of a button. At the same time, the status of the individual laboratory benches is visualized.

High level of protection thanks to programmable limits *highlink Power* guarantees that your hardware is protected at all times. The possibility of limiting the individual device parameters, such as the current limit, ensures that the connected measuring hardware or electronics not damaged. Lengthy repairs caused by incorrect operation are therefore ruled out.

Example of a DC source: power supply unit with voltage and current limiting (U_{max} and I_{max}) and automatic data storage.

Simultaneous detailed adjustment of the radio generators on all laboratory benches.

Example: fully automated test sequence with setting of the test sequence using the sequencer function.

Timer function

Example: Rights and group definition per user and per table.

Integration and control of modern teaching aids: detailed experiment instructions with teacher and student handouts are included with the teaching aids.

No setting times before the start of the experiment Start your lesson immediately and without losing any time. As part of the lesson planning, the individual device parameters can be preset for each student workstation and student and linked to a clear annual timetable. link. When the point in time is reached, all locations included in the planning are automatically set to the desired configuration. Retractable tables, for example, automatically move to the desired position and the power supplies are configured to the corresponding maximum currents for the test. *highlink Power* makes it very easy to program student workstations individually, thus increasing productivity in the classroom.

Integration of the world of teaching materials - erfi Didactic *erfi Didactic* is a separate brand of the erfi company and comprises a modern range of teaching materials for automation technology, drive technology, building automation, fault simulators, motor simulators, installation technology and much more. Many erfi teaching devices already have an interface and thus offer the possibility of intelligently integrating the devices into the lesson design using *highlink Power*. In addition to the familiar e-learning, the student is provided with a modern tool. The individual experiments are stored in the software and can be elegantly processed via the interface-compatible devices. The instructions for the experiments are visualized and the student is guided didactically.

Room control software highlink® Power

The integration of third-party devices is supported by the visualization of the corresponding device during device selection.

Examples: Graphical and tabular display of measured values. The measurement data is visualized in a table and simultaneously in a graphic during the measurement process. An HTML report for an Internet browser is created via a command.

Visualization of third-party devices

highlink Power supports the integration of third-party devices. The appropriate functions are integrated depending on the device function and customer requirements.

Reporting generator / dashboarding / data management

highlink Power enables various simulations to be carried out before the start of the test. Expected stress curves can be displayed graphically and later compared with the actual curve. Measurement data acquisition and documentation are automated and the data is stored in a professional SQL database.

Secure password management

A defined administration level allows user rights to be set individually for each teacher and student. In addition to the individual access control to the experiments, the program modules device control, lesson planning, measured value analysis and documentation as well as password management are also controlled individually, for example.

This ensures that default settings are not changed unintentionally. The erfi software development team's many years of experience pay off here and guarantee safe and trouble-free teaching.

Experimental network with highlink® Power erfi network technology consistently uses the latest Ethernet technology. Each laboratory workstation is equipped with intelligent Ethernet-capable devices that can be integrated either in an independent experimental network or in the existing in-house network. The network is planned according to the customer's wishes and requirements. Through cooperation with well-known solution providers in the field of communication and data networks, erfi has extensive experience network technology. A distinction is made between a stand-alone network and integration into an existing network.

Independent network This solution is physically separated from the rest of the network. Each PC is equipped with a second Ethernet connection (second network card). This ensures that there is no interference within the in-house network. The teacher and students access the network via the 2nd network card. One switch is sufficient to network the room. Depending on the customer's requirements, the switch is either included in erfi's planning or provided by the customer.

Integration into an existing network This solution is used when the PCs are not connected to a second network connection. A virtual network can be equipped with a connection. A VLAN switch is required for this purpose. A VLAN switch is required for this solution. Depending on the customer's requirements, the VLAN switch is either included in the planning by erfi or provided by the customer.

Fig. left: Example of an independent experimental network.

Room control software highlink® Power

highlink® Power - Training Trainer Package

- For central control of 1 instructor workstation and all student workstations.
- SQL database for all measurement data and other personalized settings.
- Interface to *CANDY Power* testing software for test planning, test sequence and statistics.
 - Interface to *AWM* production software (Assembly Workflow Management).
- Complete package for room and appliance control.
- For PC, tablet and smartphone applications.
- Platform-independent.
- Multilingualism.

highlink® Power Didactic trainer package

Local software license for the teacher per room

Order no.: HPD2.100

highlink® Power Didactic Web-Trainerpackage

Web-based software license for the teacher per room (browser-based)

Order no.: HPDW2.100

Pupil or student package

- For remote device control at the student's workstation. The student himself can access and control the devices assigned to him via his end device.
- SQL database for all measurement data and other personalized settings.
- The teacher must give permission for use and can intervene and monitor at the same time.
- Interface to *CANDY Power* testing software for test sequences.
- Interface to *AWM* production software (Assembly Workflow Management).
- For PC, tablet and smartphone applications.
- Platform-independent.
- Multilingualism.

highlink® Power Didactic student package

Local software license for all users per room

Order no.: HPD2.101

highlink® Power Didactic Web-Studentpackage

Web-based software license for all users per room

Order no.: HPDW2.101

highlink® Power - Industry Masterpackage

- For central control of all laboratory workstations.
- SQL database for all measurement data and other personalized settings.
- Interface to *CANDY Power* testing software for test planning, test sequence and statistics.
 - Interface to *AWM* production software (Assembly Workflow Management).
- Complete package for room and appliance control.
- For PC, tablet and smartphone applications.
- Platform-independent.
- Multilingualism.

highlink® Power Industry-Masterpackage

Local software license for lab managers per room

Order no.: HPI2.100

highlink® Power Industry Web-Masterpackage

Web-based software license for laboratory managers per room (browser-based)

Order no.: HPIW2.100

Single user license

- For remote device control at the laboratory workstation. The employee himself can access and control the devices assigned to him via his end device.
- SQL database for all measurement data and other personalized settings.
- The laboratory manager must give approval for use and can intervene in parallel and provide support from his or her workplace.
- Interface to *CANDY Power* testing software for test sequences.
- Interface to *AWM* production software (Assembly Workflow Management).
- For PC, tablet and smartphone applications.
- Platform-independent.
- Multilingualism.

highlink® Power Industry single user license

Local software license for all users per room

Order no.: HPI2.101

highlink® Power Industry Web single user license

Web-based software license for all users per room

Order no.: HPIW2.101

Software for device control and standalones

Device control highlink® elneos® basic

With this software package, all functions of the *elneos six* device series can be controlled remotely.

- Remote device control software for single and multiple devices (limited to 3 *elneos six* devices)
- Ideal for standalone devices
- for PC, tablet and smartphone use
- Program is provided as .EXE

Order no.: HPE1.200

Device control highlink® elneos® pro

With this software package, all functions of the *elneos six* device series can be controlled remotely. The package is particularly suitable for complete laboratories where only the devices and not the laboratory benches are to be remote-controlled.

- Remote device control software for single and multiple devices (without limiting the number of devices)
- Ideal for standalone devices and laboratories
- for PC, tablet and smartphone use
- Program is provided as .EXE

Order no.: HPE1.201

Useful extensions highlink® Power

Festo® Didactic

For the first time, didactic concepts and teaching materials from leading teaching materials manufacturer *Festo Didactic* can be integrated into the new *highlink Power* software. The package enables direct access to the relevant *Festo Didactic* applications via the *highlink Power* room control software.

This optional supplement is integrated into the student and teacher version and opens up access to the didactic world of *Festo Didactic*.

An open interface for integration into the software is included. The student thus learns in a playful way how to switch between the world of measurement technology devices and the didactic environment.

Festo Didactic applications can be integrated into *highlink Power*:

- simulation software ®
- *FluidSIM*®
- *Robotino SIM*, *Robotino*® View
- *EasyVeep*, *Festo LX* digital learning portal

Order no.: HPFESTO1.100

App applications for smartphone and tablet APP highlink® Power Android

The applications do not require a server connection and are self-sufficient. The APPs developed by erfi for your smartphone / tablet can be downloaded from the respective APP store. Independent of a web-based server platform, the application runs exclusively on Android tablets and smartphones.

- APP remote device control for Android operating system
- Download in the PLAY-Store.

Order no.: HPANDROID1.200

APP highlink® Power IOS

Independent of a web-based server platform, the application runs exclusively on IOS Tablets / OS smartphones.

- APP remote device control for IOS operating system
- Download in the Apple Store

Order no.: HPIOS1.200

erfi network technology

24-way switch for integration into the 19-inch superstructure or 19-inch cockpit (networking of workstations)

Order no. NWT1.100

8-way switch for integration into the 19-inch superstructure or 19-inch cockpit (networking of devices per space)

Order no.: NWT1.101

erfi network module (controller) for controlling and monitoring the individual table functions. (low and low voltage, PC network, up/down movement of swivel tables, etc.) 8 digital I/Os with Ethernet interface can be controlled.

Order no.: NWT1.104

System integration consisting of all contactors and relays for group / device releases required for radio functionality. **Order no.:** NWT1.110

System integration elneos® six

Factory-installed and plug-in wiring between the control center and the respective device installed in a TechCube (AC / DC source, DMM, FKG). **Order no.** EL6.SYS1

highlink® Power in the lab

The quality of the 3D spatial representation enables a clear status display of the entire laboratory.

The user can switch between different room views and levels of detail.

Tables with integrated swivel superstructures

Technical product description:

Laboratory bench with 19-inch / 3 U swivel structure

Electromotive swivel assembly: The swivel assembly can be individually combined with the standardized 19-inch device series *elneos six*,

elneos five and *basic*. Depending on the appliance equipment and power, 2 construction depths are available.

A microprocessor-controlled drive swivels the superstructure into position almost silently. A double sealing lip and dynamic current detection (security function) guarantee maximum safety. The security function monitors the continuous current consumption. In the event of overcurrent, the thrust is immediately reversed during the downward movement and stopped immediately during the upward movement. Thanks to an integrated microprocessor unit with interface, the swivel superstructures are

can be controlled individually and can be networked. Central control (individual, group and overall control) from the trainer's workstation is possible. with the erfi network module NWT1.104 and the room control software *highlink Power*.

Additional equipment
erfi network module: Necessary module for remote-controlled laboratories with *highlink Power* room control software. Microcontroller system for remote control
Order no.: NWT1.104

Note on the *highlink Power* room control software: **Order no.:** HPD2.100.
For technical description see page 178 ff.

Figure 2:
Laboratory bench with 19-inch / 3 U swivel structure (structure depth 1 = low structure depth) when extended. Worktop ergo-line (laser edge). Table with electronic height adjustment.

Figure 3:
Laboratory bench with 19-inch / 3 U swivel structure when retracted. The devices disappear completely into the working plane. The front of the device is fully encapsulated for all-round protection. Worktop alu-line (laser edge).

Optional equipment

Up/down button: For student desks to independently swivel the channel up and down.

Order no.: ELC1.5.ABT

Indication light: Integrated in the tabletop, de-Neither frontal nor circumferential. It shows the stress levels in different colors and safety at the workplace, see page 108.

chrome-plated ELCC4

Figure 1:
Single workstation with retractable unit, 1 TFT lift and 1 PC holder (optional), desk width 1200 mm. Worktop ergo-line with laser edge.

Use as a theory table: The flap closes flush with the front table. This means that the table can be used as a theory table when retracted. The view to the front is unobstructed.

Up/down control of the TFT countersink unit (standard).
Anti-trap protection between retractable unit and table thanks to brush strip.

Body of the recessed unit at the front with lockable inspection doors (3) and cable aperture boxes (4) for direct cabling of the PCs if these are mounted underneath the table top. Equipped with additional cable aperture boxes on the left and right for through-wiring between the desks.

Technical product description:

Tables with electromotive TFT retractable unit Ideal for all classrooms, training and further education facilities.

In addition to the TFT monitors (VESA standard), optional keyboard and mouse mounts can also be integrated into the motorized retractable unit. The desks are available as single and double workstations including electric motorized drives.

Lowering unit: Approx. 230 mm deep and 780 mm high. The electromotive TFT lift drives are in the retractable unit. Each drive can hold TFT monitors weighing up to 25 kg. The lifts are supplied as standard with an operating unit for Up/down control. Optionally, the lift systems can also be equipped with the erfi network module NWT1.104 and the *highlink* Power room control software. The flap is split for double workstations.

Anti-trap protection: The brush strip between the recessed unit and the table offers a high level of anti-trap protection.

Sunken tables - Tischlein deck Dich!

3 U / 6 U / Combi countersink unit

Technical product description:

Tables with electromotive lowering unit Lowering unit: The lowering unit can be individually equipped with the standardized 19-inch device series *elneos six*, *elneos five* and *basic*. Two heights are available depending on the device equipment and power. A microprocessor-controlled drive moves the lowering unit into position almost silently. A safety edge ensures optimum safety. When the safety edge is activated, a thrust reversal is initiated immediately. Current monitoring is also integrated. In the event of an overload in the upward movement, the operator switches off automatically. A multiple fuse per functional element ensures 100% safety. Thanks to an integrated microprocessor unit with interface, the sink superstructures are can be controlled individually and can be networked. Central control (individual, group and overall control) from the trainer's workstation is possible. with the erfi network module NWT1.104 and the room control software *highlink Power*.

Add-on table: The retractable unit is flush with the add-on table. This means that the table can be used as a theory table when retracted. The view to the front is unobstructed.

Design variants:

Version 1 and 2: 19-inch / 3 U or 6 U recessed unit:
D: 490 mm, H: 780 mm
Countersunk body: D: 470 mm, H: 185 or 318 mm
Add-on table: D: 630 mm, H: 780 mm
Add-on table overlaps the recessed unit by 20 mm
Total table depth: 1,100 mm

Version 3: Combi-recessed unit Recessed unit:
D: 590 mm, H: 780 mm
Countersink unit: D: 570 mm, H: 565 mm
Add-on table: D: 630 mm, H: 780 mm
Add-on table overlaps the lowering unit by 20 mm
Total table depth: 1,200 mm

Optional equipment

Up/down buttons: For student desks for stand-alone use.
up and down the sinking unit. **Order no.:** ELC1.10.ABT

Up/down button (option).

Note on the *highlink Power* room control software: **Order no.:** HPD2.100.
Technical description see page 178 ff.

Optional equipment

erfi network module: Microcontroller system, required for remote control using *highlink Power* room control software **Order no.:** NWT1.104

Experiment frame for sinking units: With cantilever, H-profiles 50 mm high, individually adjustable, between 2 vertical aluminum profiles with functional grooves.

Laboratory tables with mobile extension tables

Technical product description:

Laboratory bench with mobile extension table
This version consists of a fixed laboratory table and a mobile extension table. Both tables must be ordered separately.

Fixed laboratory bench: Version with C-foot. The laboratory bench can be firmly anchored to the wall or positioned freely in the room using floor mounting brackets. The workstation is configured individually. Table superstructures, L-profiles are possible

Fixing brackets
To the for anchoring the furniture to compo the floor or wall.

Floor mounting
order no.: ELC100.7.013

Wall mounting
order no.: ELC100.7.014

and Expand profiles 1 and 2 for holding storage boards, cockpits, devices from the *acto*, *basic* and *elneos six* series, experimental frames, etc. For configuration examples, see page 196.

Mobile extension table: Version with T-foot. 4 swivel castors Ø 100 mm. Two of the castors are lockable. A theory area can be set up quickly and easily with the mobile extension table. Just as quickly and easily, the narrow laboratory tables can be transformed into professional laboratory workstations with sufficient space for exercises. An optional stiffening frame is available for more stability.

Configuration examples

Example 1:
Laboratory bench: ELC1.1.1641.C
1600 x 400 x 780 mm. Table type 1.1. ergo-line worktop (laser edge).
Mobile extension table: ELC1.1.1661A.T 1600 x 600 x 780 mm. Worktop ergo-line (laser edge).
Structure:
19-inch table-top assembly, equipped with the *basic* and *elneos six* device series. 2-row experiment frame mounted on table top.

Basic version
laboratory table: ELC1.1.1641.C.B2
Mobile extension table: ELC1.1.1661A.T.B

Example 2:
Laboratory bench: ELC1.1.1641.C
1600 x 400 x 780 mm. Table type 1.1. ergo-line worktop (laser edge).
Mobile extension table: ELC1.1.1663A.T 1600 x 600 x 780 mm. Worktop alu-line (laser edge).
Structure:
Extended L-profiles. 19-inch cockpit, equipped with the *basic* and *elneos six* device series. 2-row experiment frame between the base profiles. Cable aperture sockets embedded in the table top, open cable tray underneath the table.

Basic version
laboratory table: ELC1.1.1641.C.B2
Mobile extension table: ELC1.1.1663A.T.B

Example 3:
Laboratory bench: ELC1.2.1648.C
1600 x 400 x 780 mm. Table type 1.2 with 180° cable flap. Optional split cable flap. Multiplex worktop.
Mobile extension table: ELC1.1.1668A.T 1600 x 600 x 780 mm. Worktop multiplex.
Connectors each in graphite black, RAL 9011.
Structure:
Extended L-profiles with Expand 2 profiles on the left and right, fitted with the *acto* and *elneos six compact* device series. 2-row experiment frame between the base profiles.

Basic version
laboratory table: ELC1.2.1648.C.B2
Mobile extension table: ELC1.1.1668A.T.B

Layout variant 1:
Laboratory work

Installation variant:
Group work

Line-up variant 2:
Laboratory work

Installation variant
Frontal teaching

Installation options:
The laboratory table and the mobile extension table provide a wide range of set-up options:

- in series
- in angle combinations
- Back to back
- Group workstations, etc.

Wall-mounted workstations with storage space

Ergonomic functional handles, select version:

graphite black (RAL 9011) Series ELCCS1

blue (NCS-S-1565-B) ELCCS3

elneos-green (RAL DESIGN 1107070) ELCCS4

zinc yellow (RAL1018) ELCCS5

Technical product description:

Wall-mounted workstations with storage space

The wall-mounted workstations consist of a base cabinet and a worktop. The structure is variable and, as with the *elneos connect* tables, can be configured as required. Table superstructures, L-profiles and Expand 1 or Expand 2 profiles for holding storage boards, cockpits, devices, experiment frames, etc. are possible. For even more storage space, an optional wall-mounted cupboard can be selected above the respective workstation.

Standard version	1 for select (.S)	2 for pro (.P)
Worktop	Corner radius 20 mm	Corners °
Handles	Ergonomic functional handle, W: 300 mm; design follows the shape of the connector	Bow handles, W: 140 mm; handle olive with lock
Hinged doors	Fitting technology invisible from the outside, 165° hinges	Visible hardware technology, 270° hinges
Plinth for base cabinet	Recessed functional base connect-LINE for optional mounting of the indication light. Design follows the shape of the connector	Set-back simple plinth

Figure 2: Same working place as Fig. 1 but in pro version. (With bow handles and handle olive, without functional sock).

Note: The L and Expand 2 profiles incl. acto equipment, the 2-row experiment frame and the vertical indication light must be ordered separately! The additional equipment is shown here as an example configuration of a workplace.

Figure 1: Wall-mounted cupboard with ladder panel and optional LED workstation light (page 107). Wall-mounted workstation with Multiplex worktop, size (W x D x H): 1200 x 600 x 930 mm. Design select. With optional connect-LINE plinth lighting (page 316). Additionally with superstructure (to be ordered separately): L-profiles with Expand 2 left and right - fitted with acto insert panels and optionally with vertical indication light in the Expand 2 profile for status display (page 108) and with 2-row experiment frame.

Figure 3: Base unit open. Top with open storage compartment, bottom with grooved mats for A4 teaching aids.

Base unit: Size (D x H) 565 x 900 mm, plus worktop with size (D x H) 600 x 30 mm

- 12 mm thick back panel, grooved
- Number of drawers (3 U, full-extension) / hinged doors: for table length 1,200 mm: 2 drawers / 2 hinged doors for table lengths 1,600 / 1,800 and 2,000 mm: 2 drawers / 4 hinged doors incl. 1 center panel
- A4 compartment/trays with grooved mats at the bottom for holding Didactic teaching aids, usable depth: 532 mm
- Base: 75 mm recessed

All base units in select design can optionally be fitted with elneos connect LINE plinth lighting.

General information on the decor of the base unit

Execution select

Not conductive:

Fronts / carcase: front white; plinth: graphite black / front white **ESD version:** Fronts / carcase: front white; Base: front white (Optionally with connect-LINE plinth lighting, see page 316.)

Multiplex

Structure: The wall workstations can be equipped with table superstructures and also with L-profiles and Expand 1 or Expand 2 profiles using adapters to accommodate storage shelves, cockpits, devices, experiment frames, etc.

Optional equipment

Vertical indication light: Integrated in the Expand 2 profile vertical. It shows the voltage levels in different colors and increases safety at the workplace, see page 108.

Connect-LINE plinth lighting: Integrated status indicator for open and closed. Alternative cabinet assembly complete/incomplete, see page 316. Only possible if select is selected.

compact-line - mobile and flexible

Technical product description:

compact-line for training and further education in the field of mechatronics / pneumatics

The compact-line is mobile for individual laboratory and workshop design. The ingenious mobile frame enables back-to-back installation and the compact-line can be pushed together to save space when not in use.

The non-tipping base frame consists of a mobile frame with 4 swivel castors Ø 75 mm, two of which are lockable. 1 aluminum foot profile on the right and left. Stepless height adjustment by means of gas pressure spring, control unit and cable drag chain. Can therefore be conveniently released and locked by just 1 person.

Back-to-back installation.

Space-saving storage.

The compact-line is available in 3 versions:

Version 1: compact-line basic model 1 2

- Travel frame
- Height adjustment
- 3 U aluminum trunking optionally with equipment 1-phase, 230 V or 3-phase, 400 V
- Size approx. (W x D x H): 1,505 x 700 x 830-1,295 mm

Version 2: compact-line complete model 3 4 /

- Travel frame
- Height adjustment
- ER mounting frame
- 2-row experimental frame
- 3 U aluminum trunking optionally with equipment 1-phase, 230 V or 3-phase, 400 V
- Size approx. (W x D x H): 1,505 x 700 x 1,953-2,073 mm

Version 3: compact-line mobile 5

- Travel frame
- Height adjustment
- ER mounting frame
- 2-row experimental frame
- Size approx. (W x D x H): 1,505 x 700 x 1,340-1,670 mm

Technical product description:

3 HE aluminum channel

The 3 U aluminum trunking with 19-inch mounting technology for devices from the *elneos six* device series

and *basic* are already preconfigured (assembly capacity* 263 TE).

The aluminum ducts have functional lids with ventilation on the left and right. The side covers are equipped with

Equipped with 3 U aluminum trunking, 1-phase, 230 V preconfigured with:

- 1-phase safety and switching unit:
 - Motor protection switch: 10-16 A
 - NFI switch type B: 30 mA, rated current 25 A
 - Emergency stop button with 2nd potential-free NC contact
 - Phase indicator light
- 4 socket outlets with earthing contact 230 V / 16 A
- 2 x 3 safety laboratory sockets 230 V (L1, N, PE)
- 2 RJ45 sockets CAT 6, 8-pin
- Fixed voltage 24 V / 5 A DC
- Compressed air control with 1 DN 5 coupling socket, self-adjusting, pressure gauge 0-10 bar, class 2.5

2 different color accents available (green RAL DESIGN 1107070 or grey RAL DESIGN 5500).

The energy channels electrically connected via an integrated multifunctional plug. The cable is led out at the bottom of the energy channel.

If the cable is not needed, it can be stowed away in the integrated cable tray.

Equipment 3 U aluminum trunking 3-phase, 400 V preconfigured with:

- 3-phase safety and switching unit:
 - Motor protection switch: 10-16 A
 - NFI switch type B: 30 mA, rated current 25 A
 - Emergency stop button with 2nd potential-free NC contact
 - 3 phase indicator lights
- 4 socket outlets with earthing contact 230 V / 16 A
- 1 CEE socket 400 / 230 V, max. 16 A
- 2 x 3 safety laboratory sockets 230 V (L1, N, PE)
- 2 RJ45 sockets CAT 6, 8-pin
- Fixed voltage 24 V / 5 A DC
- Compressed air control with 1 DN 5 coupling socket, self-adjusting, pressure gauge 0-10 bar, class 2.5

Technical product description:

Mechaline individual workstations - laboratory tables for training and further education in the field:

Mechatronics, pneumatics, hydraulics and sensors

The preconfigured laboratory benches are available as stationary and mobile units.

Mechaline single workstations stationary version

consisting of table with size (W x D x H): 1,600 x 850 x 780 / 1,750 mm:

- Mounting frame for all ER units for control and regulation technology
- 1 mobile tool container with 4 drawers (material drawer, 3x 3 U)

- The tables can be optionally upgraded with the following components:**
- 2-row experiment frame with individually adjustable rails for DIN A4 teaching aids and profile plates for hanging, see page 212
 - Profile plate between the L-profiles, size (W x H): approx. 1470 x 150 mm, see from page 217 onwards
 - Profile plate between tabletop and ER mounting frame, size 700 x 700 mm, see from page 217
 - Laboratory cord, hose and notebook holders, etc., see accessories from page 260 and page 373 onwards

Technical product description:

Mechaline double workstations - laboratory tables for training and further education in the field:

Mechatronics, pneumatics, hydraulics and sensors

The preconfigured laboratory benches are available as stationary and mobile units. These can be individually extended with various accessories.

Mechaline double workstations stationary version

consisting of table with size (W x D x H): 1,600 x 850 x 780 / 1,750 mm:

- Mounting frame for all ER units for control and regulation technology
- 2 mobile tool containers with 4 drawers (material drawer, 3x 3 U)

Mechaline single workstations mobile version

consisting of table with size (W x D x H): 1,600 x 850 x 780 / 1,750 mm:

- Mounting frame for all ER units for control and regulation technology
- Sturdy mobile frame with 4 swivel castors Ø 100 mm, two of which are lockable
- 2 tool containers with 4 drawers (material drawer, 3x 3 U)
- Storage shelf for e.g. compressor

Double-sided laboratory bench for mechatronics and pneumatics

Hexagonal workbenches

Figure 1:
Hexagonal workbench with 6 HU table superstructure and optional socket port on the table superstructure. Pedestal under the table with 3 U holder at the top for basic appliance series, 56 HP and hinged door cupboard at the bottom with lockable intermediate shelf, shortened by 200 mm at the rear for optimum legroom.

Hexagonal workbenches

The hexagonal workbenches are ideal group workstations. A group workstation consists of a table top and 6 pedestals. Depending on the version, a 3- or 6-HE table structure with

integrated device mounting mechanism for mounting the *basic* and *elneos six* insert plate range centrally on the hexagonal workbench.

Hexagonal workbenches for mechatronics engineers

Worktops

30 mm HPL laminate chipboard (laser edge), front white

Multiplex

Beech bar

Fig. 1: Hexagonal workbench for mechatronics engineers 2500 x 2165 x 859 mm, Worktop 40 mm multiplex.

Vice with jaw width 120 mm optional, order no.: ELH3.120.4, see page 270

Steel drawer container

Pre-configured hexagonal workbenches with 19-inch / 3 U table structure
Workbench size: 2500 x 2165 x 859 mm
Worktop: Beech plywood or beech crossbars, multi-layer glued, 40 mm thick. Cleanly sanded, impregnated and coated with food-safe oil. Alternatively also available as a beech bolt top. Front seat edge approx. 1250 mm.
Work surface depth: approx. 720 mm up to table structure.

Optional equipment

Additional electrification possible for each student on the table structure, see page 374.

- 1 Table structure**
Size (W x D): 825 x 715 mm, 3 U. Assembly capacity: 1 x 70 HP per side. Side length approx. 413 mm.
- 2 Steel drawer container**
Size (W x D x H): 531 x 500 x 819 mm, 5 drawers, 2x 100 mm, 2x 150 mm and 1x 200 mm. 100% full extension, 100 kg load capacity, 6x intermediate plate, color: RAL 7035 / RAL5012.

Technical product description:
Didactic mobile elneos cubix 1

The compact Didactic mobile (without superstructure, equipment and teaching aids) consists of a mobile sideboard with 1 storage compartment at the top and 2 compartments for DIN A4 teaching aids at the bottom. Swivel castors Ø 75 mm.

Two of the swivel castors are lockable. Size 1,200 x 700 x 900 mm.
With the compact Didactic mobile elneos cubix 1 The select or pro versions are .
The compact Didactic mobile can be fitted with, for example, a table structure made of wood/laminate or aluminum (see page 111 ff.) as well as a 1- or 2-seater table.
2-row experiment frame (see page 216).

Standard version	with select	for pro

Didactic-Mobile elneos cubix 2
(only available in select version!)

The large Didactic mobile is already pre-configured (as shown, without equipment / teaching aids). Size incl. 2-row experiment frame (W x D x H): 1,666 x 700 x approx. 2,015 mm. With 4 swivel castors Ø 100 mm, extremely resilient. Two of the castors are lockable. Push handle on the left. Aluminum impact protection edges on the outside of the cabinet.

Structure:

- Left: 4 drawers (4 | 4 | 4 | 7 U)
- Right from top to bottom:
 - 2-row experimental frame with cantilever
 - cubix element: Protrusion all round approx. 50 mm. With 19" receptacle for devices from the elneos six and basic device series (equipment capacity* 230 HP) and 3 open storage compartments
 - Hinged door cupboard for DIN A4 teaching materials (2x DIN A4)

- Shelf+ 100 mm
- Cockpit 3 U aluminum+ 150 mm
- Cockpit 3 HE laminate chipboard + 200 mm
- Cockpit 3 HE laminate laminate chipboard inclined + 250 mm
- Cockpit 6 HE laminate chipboard + 300 mm
- Cockpit 6 HE laminate laminate chipboard inclined + 350 mm

Experimental frame DIN A4

Experiment frames are used to hold DIN A4 experiment panels as well as perforated panels and tabletops for hanging.

The aluminum anodized H-profiles with integrated brushes are 50 mm high and individually adjustable so that ER modules from Festo Didactic, for example, can also be adjusted.

Experimental frame DIN A4 between two aluminum base profiles

The experiment frames are mounted in an ergonomic position using side brackets (200 mm indented from the rear edge of the table).

Can be combined with cockpits, storage shelves and table superstructures.

Order note

In combination with storage shelves and cockpits, the rear leg profiles of the table are extended accordingly*.

The following applies to tables with cable flap:

- 1 Experimental frame 1 - row
Profile height: 1,400 mm
- 2 Experimental frame 2 - row
Profile height: 1,700 mm
- 3 Experimental frame 3 - rows
Profile height: 2,000 mm

Order note

In conjunction with storage shelves and cockpits the rear leg profiles of the table are extended accordingly*.

The following applies to tables with table superstructures up to 3 U:

- 1 Experimental frame 1 - row
Profile height: 1,450 mm
- 2 Experimental frame 2 - row
Profile height: 1,750 mm
- 3 Experimental frame 3 - rows
Profile height: 2,100 mm

Order note

The profile heights (Fig. 3) apply to tables with 3 U-Table superstructures, Expand 2 horizontal system channels and tables with swivel superstructures.

For 6 U table superstructures, the rear leg profiles of the table are extended by + 100 mm.

* Note: The guide unit extends the table width by 70 mm in each case!

2-row experiment frame with movable guide unit and additional 360° swivel mechanism

The experiment frame can be moved horizontally. In addition, it can be 360° around its own axis so that the front or rear of the experiment frame can be used. The front can be equipped with DIN A4 teaching aids, for example, while the rear can be equipped with a perforated grid for wiring work. This allows different laboratory experiments to be called up in a matter of seconds without any set-up time.

Both the ergonomically optimal working position and the desired side of the frame can be easily and safely by one person in a very short time using quick-release fasteners. High-quality quick-release fasteners guarantee secure release and locking of the desired positions.

Other perforated sheet sizes available on request.

Fastening set for perforated sheet walls

One set contains: 100 special plastic plugs
25 Spax screws 3.5 x 12 mm
50 Spax screws 3.5 x 20 mm
25 Spax screws 3.5 x 30 mm

Order no. for rectangular perforation: ELC.Z4.010
Order no. for oval perforation: ELC.Z4.020

Storage rack for perforated sheet walls and blockboards

Sturdy steel frame. Wooden shelves with grooves for inserting 18 walls. Top with spacers for a firm stand.
Size (W x H x D): 1436 x 880 x 860 mm

Order no.: ELC.Z5

Accessories for experimental frames

Parking position for experiment frame

The laboratory tables can be equipped with an additional parking position for experiment frames at the back of the table. For 2-row experiment frames, an extended or additional foot profile must be observed, depending on height of the experiment frame!
The experiment frames can be attached and fixed in place using knurled screws. This ensures a clear view during theory lessons.

Parking position experimental frame behind the table	
for 1-row experimental frames	ELC.Z.PP1
for 2-row experimental frames	ELC.Z.PP2

Measuring cable trolley

Technical product description:
Measuring cable trolley
Sturdy welded base frame with 4 swivel castors, Ø 75 mm, 2 of which can be locked.
Size (W x D x H): 860 x 590 x 1200 or 1500 mm There are 3 versions, each with 2 different frame heights.

Measuring cable trolley version 1
Mounting plate with holes Ø 7.9 mm, for holding 66 laboratory cords per side.

Measuring cable trolley version 2
Front mounting rail fitted with:
1 laboratory cord holder with 21 carrying elements, 300 mm long, 1 hose holder
Mounting rail fitted at the rear with:
1 laboratory cord holder with 21 carrying elements, 300 mm long, 1 storage tray, size: 350 x 125 mm

Measuring cable trolley version 3
Mounting plate with 5 test lead holders per side. Up to 28 laboratory cords can be accommodated per test lead holder. A total of up to 280 laboratory cords per test lead trolley.
The test lead holders are available in brown and black (L1, L2, L3), yellow (PE), blue (-) and red (+) for optimum cable sorting.

elneos® learn cubix

The new learning islands for practical lessons.

Structure of the learn cubix.....	225
learn cubix basic elements	228
learn cubix aluminum exterior doors	230
learn cubix accessories	234

Structure of the learn cubix

With the *elneos learn cubix*, *erfi* defines a new milestone in the field of **technical laboratory equipment**. The training device has outstanding product features and the contemporary design offers decisive advantages for users.

elneos® learn cubix learning island

- 1. Perforated panel for hanging
- 2. Internal perforated metal doors to unfold
- 3. Five H-rails on the inside
- 4. Compartment for DIN A4 teaching materials covered with grooved mats
- 5. power dome incl. device equipment (*elneos six compact* optional)
- 6. Lockable double castors
- 7. Sturdy frame made of 40/40 heavy-duty aluminum profiles
- 8. Blockboard for hanging
- 9. Hook-in aluminum profile plate for Festo pneumatic components
- 10. DIN A4 teaching material holder
- 11. Festo Didactic SE ER modules
- 12. Outer door with H-rails
- 13. Indication light (series)
- 14. Pivoting RGB LED task light (optional)

elneos® learn cubix Power-Dom (upper area) On all 4 sides with the following equipment:

- 3 POAG earthing studs
- Safety and switching unit with MS 10-16 A with US release on one side, NFI switch type B, 30 mA, I_{rated} 25 A, emergency stop button with 2nd NC contact and 3 phase indicator lamps.
- With emergency stop button on all other sides.

elneos® six compact Control center in the power dome

The optional control center is used to accommodate power supply units, digital multimeters and function generators. Exemplary assembly:

- Control center, order no. EL6.1.C
 - DC regulating power supply 0-32 V / 0-2 A, 64 W, order no. EL6.LDC.032.02
 - Power and energy meter incl. digital multimeter, order no. EL6.P
 - Function generator, order no. EL6.F
- Further information in the new *elneos six* appliance series general catalog, pages 12-13, 93, 139 -157.

elneos® learn cubix Power-Dom (lower section)

- Fixed voltage source DC fixed voltage 24 V / max. 3 A
- Compressed air outlet, make Festo with inlet pressure = outlet pressure with max. 16 bar, outlet 1 coupling socket DN 7.2 self-adjusting
- 4 socket outlets with earthing contact, 230 V / 16 A
- 2 RJ 45 sockets, Cat. 6, for patching
- 5 safety laboratory sockets L1, L2, L3, N, PE 400 / 230 V, max. 16 A per phase and 1 5-pin CEE socket outlet, 400 / 230 V, max. 16 A per phase

The use of the Power Dome (extruded aluminum profile) is also available with external doors in the closed state guaranteed. Mains, data and compressed air lines can be are routed separately in the power dome. The assembly with the *acto* device series (*erfi instruments* catalog from page 56) is variable on request.

Note: Power-Dom front in elneos green special equipment (RAL DESIGN 1107070), standard equipment anodized aluminum.

Training with elneos® learn cubix

The *elneos learn cubix* concept enables all the advantages of practical teaching in training and the learning islands offer absolute flexibility and mobility.

Land use

- Optimum use of space thanks to fully utilized installation height and no loss of installation space due to energy attachments.

Vertical power dome

- A comprehensive power dome with equipment is available for each side. This includes a safety device, earthing bolt, 24 V DC supply, compressed air connection, 4 protective contact sockets, 5 safety laboratory sockets and 1 CEE socket, 2 x RJ 45 sockets as well as a reserve for further equipment.

Handling

- Perfect and easy handling thanks to weight-optimized overall aluminium construction (no steel construction).

Perfect connection options

- Highly flexible connection of additional components such as swivel arms, cable holders and much more thanks to 40/40 aluminum profiles with functional grooves.

Intelligent organization system

- Integrated A4 teaching material compartment on each side for storing the A4 teaching boards.

High security

- Indication light for displaying the different statuses in different color coding.

Flexibility

- Flexible expansion thanks to five different freely selectable door variants on each side.
- Free function due to easily movable H-profiles for use with DIN A4 teaching panels, ER modules from *Festo Didactic SE*, aluminum profile plates for *Festo* pneumatic components.
- The doors can be fitted with either perforated metal grilles or blockboards.
- The basic model can also be used without external doors.
- Even when closed, all functional elements are always accessible.
- The internal perforated metal panel can also be opened to allow further applications.

Safe stand

- High-quality double castors with locking function.
- Sturdy door construction with support from additional pedestal elements.

Lighting concept

- Flush-mounted integrated RGB LED workstation light (optional) with sensor control.

Intelligent and remote controllable

- Can be integrated into *highlink Power* room planning software, allowing voltage levels and devices to be controlled remotely.
- Can also be ideally combined with the *Festo Didactic SE* software packages.

learn cubix basic elements

The *elneos learn cubix* is a highly flexible solution for modern practical teaching and can be used immediately at any location. The modern aluminum construction has significantly reduced the weight, making it easy to handle.

Situational utilization concept

Flexible and mobile use is the strength of the new learning islands. Up to two people can work on each side, with different configurations. In addition, the power dome can also be fully used when the outer doors are closed.

Sizes

Without outer doors: 910 x 910 x 1990 mm
With outer doors: approx. 970 x 970 x 1990 mm
Outer doors open: approx. 2510 x 2510 x 1990 mm

Basic equipment

- Mobile body made of 40/40 aluminum profiles
- 4 lockable double castors with total brakes for immovable positioning
- 4 workstations (pages) for 1 to 2 pupils each

Basic equipment

Basic equipment with perforated sheet metal doors inside*

Note: The *elneos learn cubix* can be integrated into the *highlink Power* room control software (see from page 178).
1.3). The learning island can also be supplied without an interior cabinet and without a power dome.

Equipment per page

- 1 compartment fitted with grooved mats for A4 teaching aids (size W x H x D approx. 530 x 302 x 550 mm)
- 5 adjustable H-rails for holding teaching aids such as DIN A4 boards, *Festo Didactic SE ER* components or aluminum profile plates for *Festo* pneumatic components.
- 1 equipped power dome with insert plates (see page 225) standard. Anodized aluminium, *elneos six compact* optional. Including 2 switches, 1 x for the house network and 1 x for the erfi laboratory network.
- Indication light with status display (standard)

Options

- Pivoting RGB LED task light, integrated flush into the Toplight profile
- 4 internal, hinged perforated metal doors, 10 x 5 mm perforation
- 4 hinged outer doors in various designs, depending on the training group (H-rails, perforated plate, blockboard, etc.). Can be locked at 90° and 135° angles, can be used on both sides. All doors with earthing socket on both sides.

Indication light and optional task light

The indication light (in the basic version) and the swivel-mounted RGB LED work light (optional) are integrated flush into the Toplight aluminum profile. The Toplight aluminum profile also acts as impact protection.

Indication light (basic equipment)

The indication light is used for signal indication. Flowing color transitions and flashing functions indicate different states. This signaling is particularly important in training. Exemplary switching states:
green= Low voltage
yellow= Low and extra-low voltage 230 V
red = Low and extra-low voltage 230 V / 400 V

RGB LED workstation lighting (optional)

- High-performance RGB LEDs and white premium LEDs
- Contactless sensors for dimming and light color
- Integrated flush in the Toplight profile
- Pivatable and no additional installation height
- colorfast, color rendering RA> 85 %
- Glare-free, reflection-free and shadow-free working
- Light color 4500 K
- Beam angle 120°

elneos® learn cubix - Basic elements		
Basic equipment	Size (WxDxH) mm	Order no.
<i>elneos learn cubix</i> basic equipment, including 2 switches: Switch 1 house network, Switch 2 erfi laboratory network for remote control (1 RJ 45 connection on all 4 sides for each network)	910 x 910 x 1990	ELCLC.B1
Mains connection top		ELCLC.NAO
Mains connection at the bottom		ELCLC.NAU

Special equipment Power Dome front in blue, (NCS color system S 1565-B)		ELCLC.AB
4 RGB LED workstation lights, swivel-mounted	over entire width	ELCLC.APL
4 perforated sheet metal doors on the inside, rectangular perforations 10 x 5 mm	580 x 10 x 1765	ELCLC.IT1
Energy attachment as an alternative to the power dome with identical equipment	770 x 770 x 183 (3 U)	ELCLC.EA

learn cubix aluminum exterior doors

The external doors are very flexible and can be quickly adapted to the respective teaching requirements. All doors can be locked at 90° and 135° angles and can be used on one or both sides. When opened, the learning island offers four workstations for 1 to 2 people each. The doors are available in different versions depending on the training area.

Equipment example with doors

The *elneos learn cubix* shown here has the basic equipment with internal perforated metal doors, LED light and external doors with 5 H-rails. The front of the power dome shows a special finish in elneos green (RAL DESIGN 1107070).

The aluminium surface is anodized as standard. The *elneos six compact* control center was installed here as an option. Further information on the new *elneos six* appliance series can be found in the *elneos six* general catalog on pages 12-13, 93 and 139 - 157.

learn cubix aluminum exterior doors

The outer doors of the learning islands can be fitted in different ways. Depending on the design, you can use the different sizes of learning aids and combine them with the accessories.

Exterior doors version 1

4 outer doors with 5 H-rails, intermediate, adjustable. This door is very flexible and can be used to hold DIN A4 teaching aids, *Festo Didactic SE* ER modules and aluminum profile plates for *Festo* pneumatic components.

Order no. ELCLC.AT1

Exterior doors version 2 (combination of 1 & 4)

4 outer doors with 5 H-rails, intermediate, adjustable and with 2 additional H-rails at the top and bottom on one side for hanging perforated sheets or blockboards.

Order no. ELCLC.AT2

Exterior doors version 3 (combination of 1 & 5)

4 outer doors with 5 H-rails, intermediate, adjustable and on both sides with 2 further H-rails each at the top and bottom for hanging perforated sheets or blockboards.

Order no. ELCLC.AT3

Exterior doors version 4

4 external doors with 2 H-rails on one side at the top and at the bottom for hanging perforated sheets or blockboards.

Order no. ELCLC.AT4

Exterior doors version 5

4 outer doors with 2 H-rails at the top and bottom on both sides for hanging perforated sheets or blockboards.

Order no. ELCLC.AT5

Outer door with 5 H-rails for holding e.g. Festo Didactic SE ER components, DIN A4 teaching aids and an aluminum profile plate for Festo pneumatic components

Outer door with perforated plate, rectangular perforation

Outer door with perforated plate, oval perforation

Exterior door with blockboard

elneos® learn cubix - aluminum exterior doors (optional)		
Version 1	Size (WxDxH) mm	Order no.
4 outer doors with 5 H-rails, adjustable	810 x 40 x 1945	ELCLC.AT1
Version 2		
4 outer doors with 5 H-rails, adjustable and with 2 additional H-rails at the top and bottom on one side for hanging perforated sheets/joiner panels	810 x 56 x 1945	ELCLC.AT2
Execution 3		
4 outer doors with 5 H-rails, adjustable and with 2 additional H-rails at the top and bottom on both sides for hanging perforated panels/carpentry boards	810 x 72 x 1945	ELCLC.AT3
Execution 4		
4 outer doors with 2 H-rails on one side at the top and bottom for hanging perforated sheets/joiner panels	810 x 56 x 1945	ELCLC.AT4
Version 5		
4 outer doors with 2 H-rails on both sides at the top and bottom for hanging perforated sheets/joiner panels	810 x 72 x 1945	ELCLC.AT5

learn cubix accessories

Choose the wall version of the learning islands as required. The accessories can be easily integrated into the door frames.

Monitor swivel arm

Tablet holder

Perforated plate rectangular perforation

Perforated plate oval perforation

Wood blockboard

Aluminum profile plate, Can be used on both sides 700 x 700 mm. Suitable for mounting Festo pneumatic components.

Joiner's square, 250 mm (Fig. similar)

elneos® learn cubix - Accessories

Assembly and testing from a single source

Software-controlled assembly workstations with the AWM assembly software ¹ (Assembly Workflow Management)

1. Software-controlled ESD assembly workstation elneos® connect

Equipment highlights

- *elneos fix* transfer system with ball roller conveyor
- Electromotive height adjustment for feed table, assembly table and at the same time completely height-adjustable test components
- Ergonomically curved worktop with laser edge
- equipped with the AWM software ¹

2. ESD test workstation elneos® connect with VDE test system CANclass®

Equipment highlights

- Test cabin with *CANclass* Compact Tester for checking electrical safety and function ² including *Candy* test software
- RGB indication light on top of test cabin for good / bad indication
- QR code scanner included

3. ESD assembly workstation elneos® connect with elneos® Orgatower

Highlights of the equipment

- Extendable material trays
- Perforated metal panel above and below the table top
- *elneos Orgatower* extendable with drawers and pull-out shelf for integrating measurement technology

Further features

- Mounting bracket with rail and trolley
- Partially tilting shelves
- Aluminum profile with screen holder and PC
- RGB LED light with BT and HCL function
- RGB indication light on the shelf
- Mobile pedestals with bow handles and Smart-Close

Further features

- Worktop ergo-line (corner radius 20 mm, laser edge)
- Storage shelf with lockable cable drawer
- Aluminum profile with screen holder and all-in-one PC
- Integrated RGB LED light with BT and HCL function
- equipped with the AWM¹ software
- RGB indication light on the bottom edge of the cable drawer

1. ESD test workstation elneos® connect with VDE test system CANclass®

Equipment highlights

- Test cabin with *CANclass* Compact Tester for electrical safety and function ² including *Candy* testing software
- RGB indication light on top of test cabin for good / bad indication
- QR code scanner included
- Electromotive height adjustment synchronized with the ESD assembly workstation

2. Software-controlled ESD assembly workstation elneos® connect

Highlights of the equipment

- *elneos fix* transfer system with ball roller conveyor and workpiece carriers
- Electromotive height adjustment synchronized with the ESD test workstation
- equipped with the *AWM* software ¹
- Tool tray that can be moved under the tabletop at the front

Assembly and testing from a single source

Further features

- Mounting bracket with rail and trolley and pendant train light
- Partially tilting shelves
- Aluminum profile with screen holder and PC
- Front table edge with new alu-line tech edge and comprehensive laser edge
- RGB LED light with BT and HCL function
- Roll container with touch-to-open technology and smart close, locking via BT
- Pull-out material trays
- Perforated sheet wall

Assembly software AWM

As a modern worker assistance solution, the AWM assembly software supports sequential work steps via image and video. Ideal for complex

and simple production steps in the learning phase as well as for permanent quality control in the value creation process.

Flexible work plan generator

The plan generator is used for the independent creation, modification and management of work plans, including the parts list integrator in the SQL database.

- Unlimited operations for complex products
- Free formulation of questions for zero error strategy
- Free user instructions for clear, structured and mandatory workflows
- Language-independent assembly instructions enable consistent internationalization

- Freely formulated questions for worker self-checks can be freely entered in the work planner and must be answered by the worker in the sequencer with YES or NO. Images, PDFs, drawings and films can also be integrated.
- User instructions for the worker control can be freely entered in the work plan generator. These are confirmed by the worker in the sequencer. Images, PDFs, drawings and films can be integrated.

Pick and place

This feature is a graphical and image-based process. The user is informed about the respective component on the left-hand side of the screen and the material tray in which the component is located is displayed. On the right-hand side, the assembly step is explained graphically using digital photos. Written assembly instructions complete the assembly process. The parts list can be displayed in parallel.

- Component representation and assembly process representation using images, PDFs, technical drawings in various formats and movies in various formats
- Automatic start via barcode and 2D matrix code
- Scanner function to automatically call up the work plan
- Printer function for statistics and results reports
- Label printing for product labeling

Interfaces

The software runs on all tablets, regardless of the operating system.

Professional sequencer

The sequencer allows the individual work steps (from simple to complex) to be called up and processed step by step.

- Control of the sequencer via a foot pedal, alternatively via swipe gestures on the tablet

Traceability and profiles

It is possible to track who processed, tested and commissioned which and when. This secures your processes and ensures maximum safety at all levels, which you can prove at any time.

- Central management in an SQL database for user data, work plans and the results of the operations performed, measured values if available
- Integrated, useful time recording for post-calculations
- 100% tracking through product lifecycle monitoring
- Statistical functions for assembly time evaluation and for quality assurance in the event of user queries, including remote access for support and remote access to remote production sites
- Worker interaction for image and video at instal. WebCams
- Free text input for feedback and production optimization
- Multiple Choice
- digital signatures
- User management with different authorization levels (worker, QA level, AL, PL, ...)
- Authorization management for "Work plan generator", "Sequencer", "Statistics" and "User administration"
- Options for unlimited and modular expandability:
Depending on requirements and desired performance, extensive options, e.g. for hardware integration and multilingualism, can be integrated at a later date (see optional extensions).

Basic package assembly software AWM

AWM (Assembly Workflow Management) for PCs, tablets and smartphone applications

Order no.: AWM001

Invest in process optimization

Workflow and image-based representation of the work step

By making a sensible and well-considered investment, you can achieve sustainable efficiency, especially in production management. With the AWM software, you can achieve an immediate improvement in the value chain and achieve long-term efficiency.

Basic system for an efficient result

Without a high investment in hardware, you achieve immediate production progress. Extensive functions are already included in the basic package so that you can quickly get started with paperless production.

- Uniquely scalable worker assistance package in hardware and software.
- Ideal connection of the *CANDY Power* testing software and the *highlink Power* room control software via the SQL database.
- Complete CAQ system that documents all processes transparently and securely.
- Always up-to-date work schedules at all workstations, regardless of language, location and qualification.
- Increasing productivity in the value chain through graphical process support.
- Excel and other tools for a quick project start.

Effects of the AWM system:

- Increase process reliability by up to 80%
- Productivity increase of up to 20%
- Reduction of documentation requirements by up to 90%

- Local parallel storage of all data for backup in the event of a fault.
- From manual to semi-automatic paperless production in the shortest possible time, without changing systems and at the lowest possible cost.
- Employees become experienced without high expenditure.
- Statistics with live monitoring on dashboard for:
 - Completed orders
 - Defective products
 - Time evaluation
 - Evaluation of the questionnaires
 - Retrieve error images, and much more.

By carefully observing the work routines in the next step, you will recognize new possibilities. Desired features can be modularly can be expanded with hardware and additional software functions. The basic AWM system is inexpensive to get started with and avoids complex peripherals such as projectors, camera systems or pick-by-light systems.

Useful options

Expand your basic AWM production and assembly software system step by step in order to support employees in their routines and enable long-term efficiency.

- Ideal coupling to *CANDY Power* and *highlink Power* software packages (optional).
- Production data, test data and development data in one database, centrally managed and accessible at any time (optional).
- Connection to existing ERP systems (optional).
- Integration of language package to integrate foreign-language employees (optional).
- Any tools, camera and robot systems can be integrated (optional).
- Pick-by-light system can be integrated (optional).
- TAW function for parts presence check (option).

Optional additions to the AWM basic version

elneos workstation system® connect

Ideal with the *elneos connect* workstation system Basic assembly table 1.60 x 0.85 x 0.78 m (W x D x H) can be added. **Order no.:** AWM.002

Interface to the room software highlink® Power

Development has access to production data. This connection is planned and defined on a case-by-case basis. **Order no.:** AWM.003

Interface to the CANDY Power testing software

Testing and assembly from a single source. The test results from the area of electrical safety and function testing are stored together with the production data in a central SQL database. This connection is projected and defined with you on a case-by-case basis. **Order no.:** AWM.004

Pick-by-light

An LED light strip system on the respective material trays indicates the correct material assigned to each work step to the worker. This connection is planned and defined with you on a case-by-case basis. **Order no.:** AWM.005

ERP-ready interface

For direct connection to ERP systems such as SAP or others. The ERP-ready interface includes the information used to start the appropriate work plan and the data to be reported back to the ERP system. Simple connection to ERP orders and linking to work plans. This connection is planned and defined with you on a case-by-case basis.

Order no.: AWM.006

Feedback through camera monitoring

Supplementary camera system for monitoring access to the material shell. This connection is planned and defined with you on a case-by-case basis.

Order no.: AWM.007

Integration of intelligent tool systems This module allows the integration of intelligent tools such as screwdriving systems with torque monitoring and positioning. In individual cases, this connection is planned and defined with you. **Order no.:** AWM.008

Connection to robot systems

Integration and control of robot systems for semi-automated processes in which humans still have to perform manual operations. This connection is planned and defined on a case-by-case basis. **Order no.:** AWM.009

TAW Parts presence

Through scanning processes or direct ERP information, the intelligent workstation knows that all parts are present. This module prevents production from starting if not all parts are present. This connection is planned and defined with you on a case-by-case basis. **Order no.:** AWM.010

Language package

Enables the management of work plans in different national languages, so that the foreign-language worker is conveniently supported.

Order no.: AWM.011

Mounting bracket and accessories

Universal mounting bracket
For mounting workstation lights, runners and universal compressed air supply strips.
Infinitely adjustable in height.

Running rail with tool trolley
For holding balancers for compressed air and power tools.
Infinitely variable depth adjustment.

Universal compressed air supply strip Self-adjusting coupling sockets DN 5 or DN 7.2 for connecting several compressed air tools. Infinitely adjustable in depth.

Universal assembly jib / running rail with tool trolley / compressed air supply rail

Support arms and swivel technology

1 Universal adapter

For quick and easy adaptation to the aluminum system base profile. Designed to accommodate the basic or of the additional swivel arm. Suitable for heavy loads. Infinitely adjustable in height.

Order no.: ELC.UA

2 Basic swivel arm

The sturdy round bolt is inserted directly into the universal adapter. The swivel elements can be attached to the end of the swivel arm. Alternatively, the basic swivel arm can be inserted into the supplementary arm to improve flexibility and ergonomics.

Order no.: ELCM.T1

Universal support arm and plate

Mounted on the aluminum base profile. For mounting a shelf. 3 adjustable positions (0°/ 15°/ 30°).

Organizational elements for the assembly world

Useful organizational elements for perfect order

The versatile organizational elements provide free space at your workstation and thus relieve the work surface.

The infinitely horizontally sliding elements can be elegantly attached either to the erfi bridge, to the horizontal expand profile 2 under the storage shelf / appliance cockpit or to the front profile Toplight of the storage shelf / appliance cockpit. can connected using quick-release clamp connectors.

Figure 2:
Sectional drawing
1. Connection from the front at the bottom to the Toplight profile of the storage shelf or appliance cockpit.
2. Connection from behind to the bridge or to the horizontal expansion profile 2.

Spannfix articulated vices

Spannfix articulated vices

The clamping vice can be configured with various components to suit the respective application. It can be easily mounted on any work table.

Screw head

Technical data:

Clamping pressure: 150 kp
Clamping depth: 38 mm
Clamping width: 70 mm
Weight: 0.56 kg

Order no.: ELH3.001

Jaw width: 50 mm
Jaws: Plastic

Board holder

Adjustable clamping width, can be extended at any time. Work-friendly clamping by adjusting the center position, touch-safe mounting, firm clamping of the printed circuit board due to built-in spring suspension in the mounting bars. Weight: 0.28 kg.

Order no.: ELH3.002

Cover plate for equipped frames

For use in conjunction with the circuit board holder. Covered with 20 mm foam. Components of different sizes are pressed on so that soldering is possible after turning.

Weight: 0.26 kg Size: 240 x 130 mm

Order no.: ELH3.003

Universal clamping plate

Slots designed for common standard screws for building prototypes or for holding e.g. tuners, line transformers, loudspeakers etc. Weight: 0.12 kg.

Order no.: ELH3.004

Ordering example, fig. right:

- | | |

| 1. Spannfix foot with ball joint | order no.: ELH3.007 |
| 2. Quick turning device | Order no.: ELH3.006 |
| 3. Circuit board holder | Order no.: ELH3.002 |
| 4. Cover plate Bracket | Order no.: ELH3.003 |

Angle adapter

Can be used as an accessory with any work head. Enables an even wider turning circle. Weight: 0.095 kg.

Order no.: ELH3.005

Quick turning device

With permanently attached angle adapter. Enables lightning-fast rotation of the PCB holder with PCB and cover plate by 180°. Weight: 0.27 kg.

Order no.: ELH3.006

Spannfix foot with ball joint

With table clamp attachment for screwing to worktables with a max. worktop thickness of 80 mm. Weight: 0.95 kg.

Order no.: ELH3.007

Spannfix suction foot with ball joint

With threaded pin M12 x 1.5 for fixed mounting on suction base. Base plate size: 150 x 105 mm, weight: 0.80 kg.

Spannfix suction foot to be attached to the worktop via toggle lever. Weight: 0.65 kg

Order no.: ELH3.008

EMC tables / EMC workbenches

EMC table

The electromagnetically compatible table is made entirely of wood for use in EMC laboratories.

Table top: beech multiplex, 30 mm thick.

Frame: Sturdy wooden construction without metal components and connecting elements.

The table is available with or without a mobile frame / castors. 2 of the castors are lockable.

Optional equipment

Stainless steel plate: Alternatively, the EMC table can also be fitted with a stainless steel plate (natural).

Technical properties: V2A, 2 mm thick, not ground, rounded at the front.

Fastening: Screw connection on the top.

Order no. Stainless steel plate: ELCM.EP

System components for wet laboratories

Base tables for wet laboratories

Frame: Seamless and completely welded steel frame (40/40 mm). Cleanly ground, without visible weld seam, powder-coated. Height incl. table top always 900 mm.

Properties: Very good chemical resistance to acids and alkalis, even after prolonged exposure.

Table tops: Always with 30 mm overhang. **Trespa with beaded edge:** Phenolic resin solid core board.

Decor: Light gray, white.

Bead edge: Epoxy resin bonded with epoxy resin.

Thickness: 20 / 27 mm (beaded edge: 7 mm).

Composite ceramic with epoxy bead: Glazed laboratory tiles. Core board E1, melamine resin-coated on both sides in accordance with DIN 68761.

Decor: white (similar to RAL 9010). **Properties:** Resistant to alkalis and acids with epoxy resin grouting.

Bead edge: Epoxy resin.

Thickness: 30/37 (beaded edge 7 mm).

Base units

Drawer cabinet: W: 620 x D: 580 x H: 830 mm. Drawer division: 3x 3 U, 2x 2 U, made of steel, fully organizable. Usable depth 490 mm.

Hinged door wardrobe:

Variable width, depending on table width. D: 580 x H: 830 mm, with 2 hinged doors, lockable, 2 adjustable shelves, 12 mm rear panel.

Decor: Light gray, non-conductive.

Handle: Shell handle

Base: 150 mm high for media routing.

Extension of basic tables for wet laboratories

The base tables of the wet laboratories can be extended using an adapter plate to accommodate Expand profiles 1 or 2 and storage shelves. See from page 92 (L-profile) and from page 129 (Expand profile 2).

Additional options - available on request!

1 Washbasin: Polypropylene basin 400 x 400 x 250 mm incl. accessories. Stand mixer for was- (WTK/WTW), hot and cold drinking water, with swivel spout. Connection thread 1/2" A. Height 300 mm. Optionally available with a demineralized water fitting.

2 Eye shower: Hand-held eye shower for table mounting.

3 Propane gas fitting for the expansion duct 2: *acto* appliance series®. Insert plate 113 mm high, 28 TE wide. Device front: Anodized aluminium plate. Passage fitting, type 25304198131-40, UniFlex A50 quick coupling, gas plug-in nozzle, LPG media code, incl. elbow and Uniflex hose, 1000 mm long.

4 Waste garbage can: Folding waste garbage can for integration into a base unit, approx. 500 mm wide.

Splash guard made of Makrolon

Approx. 8 mm thick, variable height. Mounting via bracket on the back.

Digistorium / bench-top fume cupboard: With rear wall installation, support beam technology and "roller-free" flow in the interior. **Available sizes:** Width: 1200 / 1500 / 1800 / 2100 mm, depth 900 mm, height incl. substructure 2700 mm, working height: 900 mm.

Wide range of model variants

elneos® orgatower

the worktime experience

The models in our new *elneos orgatower* series are flexible and modular organizational talents for all technical and commercial professions. They meet all requirements in the industrial and training sectors in equal measure.

The *elneos orgatower* extends the workstation with additional storage space and enables flexible use thanks to functional units. The *elneos orgatower* can be installed either on the left or to the right of the workstation. Some models also offer free use from both sides.

Flexible and compact

the worktime experience

The elneos orgatower is ideal for the modern office. When retracted, the letterbox, brochure holder, lockable compartments and drawers are accessible. When extended, additional compartments, drawers, pull-out shelves and a power supply with snap function are available.

Note: The models shown may include optional extras.

Versatile and mobile

the worktime experience

This model offers different possibilities of use due to its two-part body. The seat offers a space for meetings and can be used with the upper part of the body retracted. The integral indication light signals whether the body is open or closed.

Note: The models shown may include optional extras.

elneos[®] orgatower

the worktime experience

The models of the new series elneos orgatower are real organizational wonders. The interior of the cabinets can be retracted and extended manually or by electric motor as a flexible cabinet element. In the retracted state, the objects are safely stored and in the extended state freely accessible. The organisational units allow flexible use and, though electrification, various devices can be connected.

The features at a glance

- Lockable cabinet fronts and drawers
- Internal organization freely configurable
- Support rail for material chutes
- Touch-to-open drawer opening function
- Numerous front decors to match the outer body
- Recordings for DIN A4 didactic teaching aids
- Electrification through internal profile technology
- Magnetic front as pinboard function
- Acoustic surfaces for sound insulation
- Electronic locking system with remote control
- Indication light for status display open-closed
- Twintower for use on both sides
- And much more

Outer corpus and inner body

Colours of the outer corpus

The outer corpus of the elneos orgatower is available in front white and graphite black. The colour of the outer body is coupled with the choice of a front decor. The combination of the front decors with two exterior body colours is shown on the following pages.

The front decors with order numbers ELCOD1 to ELCOD10 are available for the outer body in front white and the front decors with order numbers ELCOD11 to ELCOD20 are available for the outer body in graphite black.

Inner life and inner body

The inner body with all internal parts such as drawers, drawer fronts, side walls, shelves and pull-outs is always equipped with front white decor as standard. The internal drawer fronts can also be ordered in the selected front decor as an option.

All order options for the elneos orgatower can be found on the following pages. The ordering process is explained in detail on page 296.

Laser-edge technology for all decors

Due to a new laser technology for edge fusion, we offer incomparable quality for all wood elements. All decors have a jointless connection with a permanent connection.

The fusion of edge and panel increases the heat resistance as well as the moisture resistance of the components. The colour of the material layer is exactly matched to the decorative layer and the result is a visual effect that of a full material. The laser edge technology has a special hardness of the material layer and the rubbing out of the joint in everyday life is prevented – dirt joints are a matter of the past.

All joints of the decors in laser-edge technology

Front decors for front white corpus

The front decors of the elneos orgatower

The decors offer a variety of possibilities to set specific accents. If you have decided for a front decor, you can optionally order the interior drawer fronts in the same decor. With decor ELCOD1, ELCOD2 and ELCOD11, its drawer fronts are always front white.

The special decor „Magnetic Front“

This special decor offers a magnetic pinboard function. Plans, notes etc. can be attached to the front of the orgatower with magnets. The decor is high-gloss and can be combined with a front white or graphite black body. Even if you choose an ESD-conductive version, this special decor can be used for the front.

Front decors for graphite black corpus

Standard plate material

The core of the panel material consists of raw chipboard and meets the technical standards of DIN.

Technical data: Raw chipboard, chipboard with fine chipboard top layer according to DIN EN 312 CE. The board is coated on both sides with melamine resin.
Chemical resistance: against organic solutions medium, weak acids and alkalis, petrol, oil.
Bulk density: approx. 620 kg/m³

ESA-conductive plate material

With this material, the entire outer body, the inner body and all drawers are manufactured in ESD design (front decor Order no.: ELCOD11). The models also have metal height adjusters and a socket for safe earthing.

Technical data: ESA raw chipboard, electrostatically conductive raw chipboard with fine chipboard surface layer in accordance with DIN 61340-5 Parts 1 and 2 (volume-conductive). The plate is coated on both sides with a conductive melamine resin coating.
Chemical resistance: against organic solvents medium, weak acids and alkalis, petrol, oil.
Contact resistance: R_D 1x10⁴ till 1x10⁹ Ohm
Bulk density: approx. 620 kg/m³

Note: The decor representation on the monitor or in the print version may differ from the original decor.

Standard equipment

Standard equipment of the models

Each model offers different possibilities. For example, in model 1, the shelves are equipped with and model 58 offers a wide range of special function a lockable mailbox.

Hanging files and drawers

The devices for hanging files are generally included if the drawer height is 6 U (models 45, 48, 59). All internal drawers are fully organisable and can be opened via touch-to-open.

Mounting profiles

The mounting profiles and rails for material trays or office filing elements are ready for use configured set (models 4, 29, 30, 45).

Shelves with grooved mats

For space-saving and safe storage of DINA4 didactic teaching aids, these shelves are equipped with grooved mats (models 1, 2, 20, 21, 40, 41).

Letter slot and brochure holder

For internal mail, Model 58 offers a mail slot combined with a lockable subject. In addition, this model offers a holder for magazines or brochures.

Valuable compartment with lock

Some models have a lockable compartment for storing important documents (models 45, 46, 47, 48, 58).

Manual locking

All models can be closed manually as standard (Soft-close) and locked with a lock. Twintowers are equipped with two locks. Electronic central locking is available as an option (optional extra on page 24-27).

Electrification

Some models offer electrification via the Expand 2 aluminium profile with shockproof sockets and RJ45 sockets (7, 27, 45, 50, 51, 52, 53, 54, 58).

Brush strip and cable gland

The brush strip and the cable outlet in the shelf allows cables to pass through. This allows devices to be connected even when on different levels. (models 7, 27, 28, 50, 52).

Seat cushion

The seat cushion is only available for the small and large elneos orgatower. Front decors with a wood decor, the cushion colour changes automatically from green to black (models 13, 14, 53, 54, 55, 56).

Shelves with grooved mats

Seat cushion in green

Brush strip in shelf

Suspension file in drawer with 6 HE

Optional equipment

Special equipment

In addition to the standard equipment you have the Possibility to order additional functions. The order numbers can be found at the end of the text.

Indication light

The indication light indicates whether the elneos orgatower is open or closed. The red light color indicates the open state and green indicates the closed state. The aluminium profile of the indication light provides edge protection, a storage channel for small utensils and a functional groove.

Order no.: ELCO100.1

Electronic central locking system

The electronic central locking function is supplied with a transponder for locking.

Order no.: ELCO100.2

Motorised pull-out with radio remote control

The motorized pull-out enables the motorized retraction and extension of the inner body (not in the connection with electronic central locking).

Order no.: ELCO100.3

Cable sets for cabling in series

The cable sets are suitable for elneos orgatower, which stand between two tables. A rear mounted cable duct allows the cabling in series and a corresponding screen serves as privacy screen. The cable set includes a correspondingly wide cover and a cable duct with or without electrification. The front panel decor is adapted to the respective colour of the outer body and also the front panel width to the selected model.

Cable set table depth 850 mm

- Cover in 50 mm depth
- PVC cable duct, pure white, access from above

Order no.: ELCO100.4

Cable set table depth 1000 mm

- Cover in 200 mm depth with cable outlet socket
- Aluminium cable duct (empty), access from above

Order no.: ELCO100.5

Cable set electrification table depth 1000 mm

- Cover in 200 mm depth with cable outlet socket
- Aluminium cable duct with 3 sockets and 2 RJ45 sockets, access from above

Order no.: ELCO100.6

Optional equipment

Acoustic surface

Room acoustic orgatower with acoustic decor in the outer body and the front.

Room acoustic orgatower

The elneos orgatower can also be ordered as room-acoustic furniture with an acoustic decor. This acoustic decor is only available in decor colour front white for the outer and inner body. The side walls, the rear wall of the outer body and the outer front of the extendable inner body are manufactured in a sound-absorbing surface.

The acoustic surfaces are used for sound absorption of speech, noises and sounds in accordance with the surroundings. All models optionally available.

Order no.: ELCO100.7

This special equipment brings the acoustic functionality into harmony with the formal aesthetics which noticeably improves the working atmosphere. The orgatower is positioned as a functional and aesthetic room element in industrial laboratories as well as in classrooms in all subject areas. The material guarantees a short reverberation time and a very high degree of sound absorption.

Structure of the acoustic surface

- A) HDF-deck with perforated direct coating
- B) Circulating frame
- C) Optimized acoustic fleece
- D) Acoustic absorbing special filler

Technical data and features

Sound absorption coefficient (α)

The sound absorption coefficient α indicates the ratio of the absorbed part of the sound to the occurring strength of the sound. If the sound is completely reflected, the following applies $\alpha = 0$, in the case of complete absorption is $\alpha = 1$. The high-quality acoustic materials used here have a weighted sound absorption coefficient of $\alpha_w = 0,75$.

Equivalent sound absorption area A

Multiply the sound absorption coefficient (α) of the component by its area in m^2 , the sound-absorbing efficiency is obtained in m^2 or the equivalent sound absorption surface A. This is a model surface which absorbs completely, i.e. whose sound absorption coefficient = 1.

All absorption properties are concentrated in this area, which can be thought of as an open window area. On average, the following equivalent sound absorption areas A result:

Small models (780 mm height): $A = 1,23 m^2$

Medium models (900 mm height): $A = 1,42 m^2$

Large models (1.200 mm height): $A = 1,89 m^2$

A large model therefore provides an area of $1.89 m^2$, which absorbs sound 100%. If 10 of these elneos orgatowers are used in a room, $18.9 m^2$ contribute of the sound absorption in the room.

Improved reverberation time

If the acoustic components are installed in the elneos orgatower, the reverberation time improves significantly. By shortening the reverberation time, maximum intelligibility of the speech is achieved.

Economic aspect

Due to the visually unobtrusive integration of the acoustic components, very good sound absorption can be achieved. Additional sound absorption panels to be attached to ceilings and walls can in most cases be reduced in order to reduce the overall costs.

Note: In addition to furnishings, ceiling, floor and wall materials determine room acoustics.

Order configuration

Configuration of the models

With the series elneos orgatower we offer you numerous models, which you can adapt additionally. An order builds itself by several order numbers:

1. choice of model
2. choice of the front decor
3. option drawer front in front decor
4. option special equipment

1. Choice of model

Select a model with the appropriate ordering number from pages 29 to 43. Once you have selected a model, select „.L“ for left of the table or „.R“ for right of the table. Replace the .X after the model number with a „.L“ or „.R“.

Some models have a twin option and can be used on both sides with the same equipment. These models have the twin option and no „.L“ or „.R“ is specified.

Order example left
Model: ELCO27.L (Model 27, Left)
Front decor: ELCOD3 (Chartreuse Green)
Option: ELCO100.8 (drawer fronts in front decor)

2. Choice of the front decor

Select a front decor of the orgatower from pages 288 and 289. The choice of the front decor determines the colour of the outer body.

3. Option drawer front in front decor

Optionally, you can order the internal drawer fronts in the selected front decor. This applies to all front decors except ELCOD1, ELCOD2 and ELCOD11. To order this option, use your own order number.

Order no.: ELCO100.8

4. Option special equipment

Functions such as indication light or central locking are optional and have their own order number. Information on optional extras can be found from page 293 onwards.

Order example right

elneos wardrobe system[®] cubix

The elneos® cubix wardrobe system

The elneos cubix cabinet system stands for the highest quality standards. Areas of application are technology, laboratory and office. The cabinets are equipped with hinged doors, modern pull-out shelves and drawers. The cupboard walls can be extended upwards to the ceiling with add-on cupboards and ceiling panels. There are 2 different versions, **select** or **pro** to choose from. These differ in terms of function and design.

Special features of the design select:

New design language (as standard): Handles, glass cut-outs and plinth follow the shape of the connector (see left 1 to 3 and page 316).

New combination function of touch-to-open / Smart-Close technology (standard): Internal drawers and pull-out shelves combine touch-to-touch technology for the first time. open and Smart-Close in one function (see left 5 and page 316).

Touch-to-open technology (optional): Handleless design. Doors / drawers open by pressing lightly on the fronts. Note: Functional handles are omitted (see left 4 and 5 and page 316).

New invisible hardware technology (standard): Hinged doors are with high-quality fittings that are invisible from the outside.

are (see left 7 and page 316)

New surfaces (optional): Magnetic and writable fronts for full and half units
Cupboard doors (see page 316).

Aluminum impact protection on the outside of the cabinet (optional):

Doubling on the left and right (each 19 mm thick). Each corner, front and rear, is protected against impact by a 90° aluminum round profile (see left 8 and page 316).

LED interior lighting (optional): For cupboard doors without glass, the LED interior lighting switches on automatically.

automatically on and off. For glazed doors (glass cabinet) is fitted as standard with an invisible sensor embedded in the outer wall of the cabinet for continuous operation. lighting (see 9 left and page 316).

Connect-LINE plinth lighting (optional):

Integrated status display for open and closed. Alternative cabinet equipment complete / incomplete (see left 1 and page 316)).

Modern cubix elements (optional): The wardrobes / wall units can be flexibly extended with the modern elneos cubix modules (see page 336).

Various locking systems (optional): Key, RFID or electronic central locking by radio (see page 342).

Technical design of the elneos cubix select and pro series:

- Rear panel: visible rear panel, 12 mm grooved
- Shelves: 25 mm thick. 1 construction shelf and adjustable shelves see description
- Rows of holes: In a 32 mm Euro fitting grid for flexible fitting with shelves, pull-out shelves, drawers. For 600 mm deep cupboards 3 rows of holes provided per enclosure side.
- Shelf supports: Made of metal, nickel-plated, with safety catch
The locking pin prevents accidental removal.
- Hinged doors: High-density chipboard with textured, anti-glare plastic coating or glass insert. Door opening angle elneos cubix select: 165° / elneos cubix pro: 270°. For cupboard next to cupboard or with aluminum impact protection on the outside of the cupboard, opening angle corresponding to 165° to 180°, depending on lock and handle.
- Drawers: with concealed mounted ball cage guide and telescopic pull-out as well as pull-out stop (Stop-Control). Drawers generally with full-extension runners. Usable width of basic cupboard 600: 490 mm
Usable width of basic cupboard 1,000: 890 mm
Usable depth with 420 mm cupboard depth: 326 mm
Usable depth with 600 mm cupboard depth: 491 mm
- Locking: All-metal espagnolette lock and security locking cylinder, suitable for general and master key systems, optionally with electronic locking system or RFID.
- Plinth construction: Integrated cupboard plinth, 100 mm high, with heavy-duty height adjustment control unit.

System dimensions for base and top cabinets
(Dimensions without aluminum impact protection on the outside of the cabinet)

Base cabinet 1,000:

1,000 x 420 / 600 x 2,000 mm (W x D x H) **Basic cabinet 600:** 600 x 420 / 600 x 2,000 mm (W x D x H) **Top-mounted cupboard without ladder panel:** 1,000 / 600 x 420 / 600 x 720 mm (W x D x H) **Top-mounted cupboard with ladder panel:** 1,000 / 600 x 420 / 600 x 900 mm (W x D x H)

Tall units elneos® cubix select

Sideboards elneos® cubix

Sliding door wardrobe with floating doors

Hinged door wardrobe with fittings that are invisible from the outside

90° aluminum round profile (option)

Touch-to-open (option)

connect-LINE base with indication light (optional)

Sideboards elneos® cubix

The sideboards in the elneos cubix series meet the highest quality standards. They are used in technology, laboratories and offices. The cabinets are equipped with hinged doors, drawers, sliding doors or roller drawers. There are 2 different versions to choose from, **select** or **pro**. These differ in function and design.

Special features of the design select:

New design language (standard): Handles and plinth follow the shape of the connector (see left ① to ② and page 330).

Touch-to-open technology (optional): Handleless design. Doors / drawers open by pressing lightly on the fronts. Note: Functional handles are not required (see left ③ and page 330).

New invisible fitting technology (standard): Hinged doors are fitted with high-quality fittings that are invisible from the outside (see left ④ and page 330)

New surfaces (optional): Anti-fingerprint surface to avoid unsightly fingerprints on the top panels of the sideboards (see left ⑤ and page 330).

Aluminum impact protection on the outside of the sideboard (standard): Each corner, front and rear, is protected against impact by a 90° aluminum round profile (see left ⑥ and page 330).

Connect-LINE plinth lighting (optional): Integrated status display for open and closed. Alternative cabinet equipment complete / incomplete (see left ① and page 330).

Modern cubix elements (optional): The side boards / wall units can be flexibly extended with the modern elneos cubix modules (see left ⑦ and page 336).

Various locking systems (optional): Key, RFID or electronic central locking by radio (see page 342).

Technical design of the elneos cubix select and pro series:

- Cover panel: elneos cubix select 19 mm / elneos cubix pro 30 mm
 - Rear panel: visible rear panel, 12 mm grooved
 - Shelves: 25 mm thick, adjustable in hole pattern
 - Rows of holes: In a 32 mm Euro fitting grid for flexible fitting with shelves. For 600 mm deep cupboards, 3 rows of holes are provided per cupboard side.
 - Shelf supports: Made of metal, nickel-plated, with locking pin to prevent accidental removal.
 - Hinged doors: High-density fine chipboard with textured, anti-glare plastic coating. Door opening angle elneos cubix select: 165° / elneos cubix pro: 270°.
 - Sliding doors: floating mounted with perfect Running properties. With select version with Smart-Close as standard. With pro version at an extra charge.
 - Roller shutter: Roller shutter system in silver-grey
 - Drawers: with concealed ball cage guide and telescopic pull-out and pull-out stop (Stop-Control). Drawers generally with full-extension runners.
- Usable size for 434 / 474 mm cupboard:
327 mm width,
330 mm depth for 424 mm cupboard depth and
490 mm depth for 605 mm cupboard depth
- Usable dimensions for 804 / 844 mm cupboard:
690 mm width,
326 mm depth with 424 mm cabinet depth and
491 mm depth with 605 mm cabinet depth
- Usable size for 1,004 / 1,044 mm cupboard:
890 mm width,
326 mm depth with 424 mm cabinet depth and
491 mm depth with 605 mm cabinet depth
- Lock: All-metal espagnolette bolt espagnolette bolt lock and security locking cylinder, suitable for general and master key systems, optionally with electronic locking system or RFID.
 - Plinth construction:
elneos cubix select: Integrated cupboard plinth, 100 mm high, elneos cubix pro: Without functional plinth.

Locking systems

Example of manual closing

Single key, keyed alike for

- 10 Container at the teacher's desk, sliding door cupboard
- 20 Container at student desks
- 30 Hinged door wardrobes

Master key for

- 40 All locks in the room

Example of electronic locking by radio

Electronic locking for

- A Drawers Hinged doors Sliding doors
- B Roller shutters
- C

Infrared transmitter+ Programming stick/programming transmitter for

- 1 Container at the teacher's desk, sliding door and roller shutter cabinet
- 2 Containers at school desks
- 3 Hinged door wardrobes
- 4 All locks in the room

Manual locking system

Single lock (series)

This design is standard for all locks!

Order no. Spare key for single lock, optionally different or keyed alike: ELCC.ME

Note: 2 keys are always supplied with each lock!

different locking

keyed alike

Main locking system

Scope of delivery: Different locking individual locks in one room, each with 2 matching keys and 2 master keys suitable for all locks.

Main locking system

Surcharge for master key system-compatible single lock (per cylinder)	ELCC.MH.1
Spare key for master key-operated single lock	ELCC.MH.2
Additional master key	ELCC.MH.3

General master key system

Scope of delivery: Different locking individual locks in several rooms (group), each with 2 matching individual keys and 2 group keys per room (group), suitable for all locks per room (group) and 2 master keys suitable for all locks of the master key system.

General master key system

Surcharge for master key system-compatible single lock (per cylinder)	ELCC.MG.1
Spare key for master key system-compatible single lock	ELCC.MG.2
Further group key	ELCC.MG.3
Another master key	ELCC.MG.4

Electronic locking systems elneos® lock

Electronic locking system with radio 2.4 GHz A transmitter (2-channel hand-held radio transmitter) that activates an electronic control module at the push of a button, which in turn triggers the motorized locking mechanisms to unlock or lock the furniture - even over long distances.

Note: Electronic locking is not possible for complete glass doors and roller shutter systems! Doors with touch-to-open function must be checked if necessary!

Advantages of the elect. locking system with radio:

- Convenient solution - simultaneous control of several locks possible
- Open and close at the touch of a button
- Possible over long distances
- Specific access permissions programmable
- Automatic locking can be set after a certain period of time
- Programming is retained even without power supply

- Minimal administrative effort thanks to simple programming using the supplied T-piece for programming the locks per transmitter (hand-held transmitter). 50 transmitters/lock can be programmed and approx. 10 locks per transmitter (recommended)
- Visual display of locking and unlocking processes
- Wireless thanks to internal power supply
- Visual warning when the battery voltage drops
- Commercially available batteries
- Simple battery change
- Optical display with connection option for emergency power supply with cable (depending on the lock type, a separate emergency power supply device is required)

Note: A reset removes all transmission codes from the furniture lock. Individual hand-held transmitters cannot be deleted!

Fig.: Detailed view of electronic locking using a transmitter - even over long distances.

Electronic locking by radio		
2.4 GHz radio transmitter		ELCC.E.1
Additional 2.4 GHz radio transmitter (optional master key)		ELCC.E.2
Electronic locking	for hinged doors	ELCC.E.11
	for drawers	ELCC.E.12
	for sliding doors	ELCC.E.13
	for mobile / suspended pedestals	ELCC.E.14
	for Orgatower, apothecary cabinet, wall cabinet	ELCC.E.15

Electronic locking system with RFID

When a user card is held in front of the RFID lock, an electronic control module is activated, which in turn causes the motorized locking mechanism to unlock or lock the furniture.

You can choose between 2 operating modes. **Fixed access:** Card is assigned to the lock **Free access:** Card is activated or deactivated again when the lock is operated

Note: RFID locking is not possible for entire glass doors and roller shutter systems! Doors with touch-to-open function must be checked if necessary!

The following cards are for this system:

- Master cards: Set consisting of...
 - Master card: Is required for teaching the user cards and for configuring the locks. It is also used for emergency opening. Only 1 master card per lock can be programmed, several locks per master card are possible
 - Update card: Firmware updates can be loaded onto the locking system in conjunction with the master card

- Service key card: The master card is unique and therefore guarantees the security of the locking system. Duplicates can only be obtained from the manufacturer using the service key. If this card is lost, no further Master card can be obtained!

- User cards: Up to 50 user cards can be programmed per lock (with fixed access)
- Programming cards: For setting and changing various functionalities on the lock

Advantages of the elect. locking system with RFID:

- Visual and acoustic signaling when closing / unlocking
- Transponder tags or wristband transponders can be used instead of user cards. The compatibility of third-party providers must be checked
- No time-consuming reordering of keys when employees change or relocate, just simple reprogramming
- Wireless thanks to internal power supply
- Visual warning when the battery voltage drops
- Operating modes freely selectable: Fixed allocation, free choice of cabinet
- Micro USB port on the RFID reader for an emergency power supply (using a commercially available power bank)
- Optional management software (MS) for authorization assignment and administration at the click of a mouse

Functional seating furniture elneos® stay

The elneos stay functional seating furniture offers plenty of storage space and impresses with its functional design. All drawers and doors are fitted with a lock, optionally with electronic locking. Touch-to-open function for drawers and doors is included. Each corner is protected against impact by a 90° aluminum round profile. The plinth "elneos connect-LINE" is designed as a recessed sandwich construction to provide an optional indication light for the "open" or "closed" status display. "closed" to be included. The elneos stay functional seating furniture is ideal for the Share and Discuss work mode.

- Décor:**
Body: graphite black / front white, fronts: front white

Fig. 4: Example of elneos mobile in the laboratory area. With 19-inch aluminum channel - equipped with the elneos six device series, keyboard drawer, 3 U device container with front door, expand profile 2 on both sides to accommodate actio insert panels (see page 140). Extended with monitor holder accessories (see page 372).

Technical product description:

elneos connect Mobile

elneos Mobile are flexible and versatile, z. e.g. in medicine, laboratories, schools, etc. Different models are available depending on the application and intended use.

Base frame incl. base plate: Consisting of sturdy welded steel frame with 4 heavy-duty swivel castors. Base plate, 30 mm thick, melamine resin-coated.

Castors: Heavy-duty, Ø 100 mm. 2 lockable castors.

Base profiles: 2 aluminum L-profiles, each solidly bolted to the steel frame via 2 brackets. To accommodate all modules: Shelves, pull-out shelves, keyboard pull-outs, drawer pedestals, 19-inch equipment containers (except Orgamobil) and accessories. Heights: 780 / 1300 / 1600 / 1800 mm.

Configuration modules: All modules (shelves, drawer containers, etc.) can be fixed in the groove of the aluminum profile using steel brackets. All shelves are melamine-coated. All configuration modules are variable in height.

Handles for configuration modules: The configuration modules are equipped with a black bow handle as standard. Alternatively, the ergonomic functional handle can be selected in different colors, see below.

Base frames

Mobile unit (W x D): 646 x 758 mm
Usable area (W x D): 525 x 600 mm
Height shown: 1100 mm

Orgamobil (W x D): 721 x 758 mm
Usable area (W x D): 600 x 600 mm
Height shown: 1300 mm

Energy mobile (W x D): 821 x 758 mm
Usable area (W x D): 525 x 600 mm
Height shown: 1600 mm
Optionally with continuous Expand 2 profile

The models

- 1. elneos connect mobile device**
Consisting of base frame incl. base plate, castors and lateral aluminum L-profiles. Size (W x D x H): 646 x 758 x 780 / 1,100 / 1,300 / 1,600 / 1,800 mm
Usable area (W x D): 525 x 600 mm
- 2. elneos connect Orgamobil**
Consisting of base frame incl. base plate, castors and lateral aluminum L-profiles. Size (W x D x H): 721 x 758 x 780 / 1,100 / 1,300 / 1,600 / 1,800 mm
Usable area (W x D): 600 x 600 mm
- Note:** 19-inch device containers not possible here!

- 3. elneos connect Energiemobil**
Consisting of base frame incl. base plate, castors and lateral L-profiles made of aluminum. **Special feature:** Here, the L-profiles are set further inwards to optionally accommodate continuous Expand 2 profiles.
Size (W x D x H): 821 x 758 x 780 / 1,100 / 1,300 / 1,600 / 1,800 mm
Usable area (W x D): 525 x 600 mm

Caddymobil base frame
Size (W x D x H): 481 x 460 x 1100 mm
Consisting of a sturdy welded steel frame with 4 heavy-duty swivel castors. Base plate, 30 mm thick, melamine resin coated.
Castors: Heavy duty, Ø 100 mm. 2 lockable castors.
Base profiles: 2 aluminum L-profiles, each solidly screwed to the steel frame and the side walls of the roller shutter cabinet using 2 brackets. To hold the shelf.

Shelf included
Size (W x D x H): 430 x 460 x 20 mm
Melamine resin-coated, with sturdy steel brackets for fastening in the grooves of the aluminum profile. Can be tilted forwards by 15°, including 2 adjustment levers and stopper edge at the front.

Including lockable roller shutter cabinet
Size: 430 x 460 x 850 mm (W x D x H) Includes:

- Adjustable pull-out shelf with stopper edge at the rear,
- Adjustable shelf with stopper edge at the rear
- Permanently fitted shelf as a construction shelf with stopper edge at the rear
- Steel drawer with wooden front, fully organizable, Size (NB x NT): 327 x 330 mm
- Lockable roller shutter system in silver-grey

Caddymobil incl. shelf and roller shutter cabinet

elneos® 19 - Modern 19-inch cabinet system

elneos® 19 - modern 19 inch cabinet system

Technical product description:

Design features

- Enclosure to DIN 41494 / IP protection class 20
- Sturdy welded steel frame at the top and bottom
- 4 aluminum profile feet, solidly screwed to the steel frame
- Aluminum profile base with 6 functional grooves for connecting useful system components
- 2 front and 2 rear 19-inch grid profiles each
- 2 side panels made of sheet steel, powder-coated, easy to dismantle
- 1 lockable wooden rear door
- 1 cover plate made of sheet steel, powder-coated
- Optionally with ribbed aluminum base plate
- Stationary version with 4 floor levelers
- Mobile version with 4 heavy-duty castors

Cover plate with integrated fan plate
Cover plate made of sheet steel with integrated fan plate including 2 fans and temperature controller. Replaces the standard cover plate.

The fan plate for **enclosure depth 688 mm** contains 2 cut-outs for extending from 2 to 4 fans. The fan plate for **an enclosure depth of 888 mm** contains 4 cut-outs for extending from 2 to 6 fans.

Technical data for 1 fan:

- Rated operating voltage: 230 V
- Rated power: 19 / 18 W at 50 / 60 Hz
- Air flow rate (free-blowing): 160 / 180 m³/h, 50 / 60 Hz
- Temperature range: - 10 °C to+ 55 °C

Technical data for temperature controller:

- Rated operating voltage: 250 V
- Temperature range:+ 5 °C to+ 55 °C

Fan extension kit for 1 cut-out

Order no.: V 47.2.104

Fastening sets

19 inch fixtures and front panels

For attaching a 19-inch installation or a front panel to two 19-inch grid profiles.

Set consisting of:

- 4 M6 cage nuts
- 4 M6 x 12 screws
- 4 plastic washers

Order no.: ELC47.3.102

Cable ties, 20 pieces

Quick fixing of cables to the 19 inch grid profile at the rear or to adhesive plates on the side walls. Made of plastic.

Order no.: ELC47.3.105

Adhesive plates, 20 pieces

- For one-time gluing to the side panels
- For attaching cable ties
- Made of plastic

Order no.: ELC47.3.106

Fastening material for socket strips For mounting a socket strip in the rear area of the 19-inch enclosure

Order no.: ELC47.3.115

For socket strips, see page 374.

Interior cabinet light

For mounting in the 19 inch cabinet.

- 8 W / 230 V, 50 Hz
- Electronic ballast
- Prismatic lamp cover / glare-free light
- Luminaire length 310 mm
- Color white
- Incl. mounting material

Order no.: ELC47.3.112

19-inch keyboard insert 1 U mouse pad and 19-inch keyboard

19 inch keyboard drawer 1 U

- Mounting on 19 inch grid profiles
- Sheet steel
- For 19 inch keyboards with touchpad mouse or trackball, for max. dimensions 417 x 210 x 39 mm
- Closed at the front and lockable
- Incl. mounting material

Order no.: ELC47.4.110

Mousepad, retractable

- Attachment on the right or left of the 19-inch keyboard drawer
- Folds away into the keyboard drawer when not in use
- Sheet steel
- Only in conjunction with 19 inch keyboards max. 39 mm height

Order no.: ELC47.4.111

19 inch keyboard

- For installation in the 19-inch keyboard drawer in conjunction with a touchpad mouse
- German keyboard layout, 105 keys, IP 20
- Film contact technology
- Size 405 x 180 x 38.9 mm
- PS / 2 plug
- Switching force 0.6 N/ 4.0 mm
- Operating temperature 0°C to 50°C

Order no.: ELC47.4.112

Accessories

- 19 inch system light, 1 U**
- Mounting on 19 inch grid profiles
 - 11 W, with 1 Schuko socket outlet
 - Aluminum housing
 - Schuko sockets DIN 49440, 250 V ~, 16 A

Permanent ESD monitoring
The ESD monitors for 1 or 2 users permanently monitor the correct earthing. If a connection is unintentionally disconnected (the wrist strap is taken off or the earthing cable of the table mat is torn off), an audible and visual operator alarm is triggered. When leaving the work area, the operator can remove his wrist strap "park" at a special connection point so as not to trigger an alarm.

For 1 user:
Multi-mount monitor
Mounted underneath the table top. The monitor permanently monitors the correct earthing of a wrist strap and an ESD work surface.
Order no.: ELC.EM.1U

For 2 users:
Dual permanent monitoring system DK 4 / DK 10
Mounted underneath the tabletop, optionally on the left, right or in the middle. Additional visual status display, which can be mounted on the table top or on the table structure. The visual status display is optionally available integrated in a front panel, see page 157. The monitor permanently monitors the correct earthing of two operators and an ESD work surface (optionally with 2 DK 4 or 2 DK 10 connections).
Order no.: ELC.EM.2U
